[Re: Ed photo, Reedsport Oregon](#)

by [senga](#) » Sat Dec 13, 2008 8:20 am

I found it last year on the net. It was in a logging photo inventory on the net. I looked through hundreds of pics and found Ed. I blew the face up and compared it to photos that exist. It appears to be spot on. I have also dug up much more than I thought I ever could. It takes some imagination to find the truth sometimes. Seems my intuition has payed off. I was gathering files to write a book, it was all about the money. I thought to myself, my wife and family will be so proud of me if I had a good seller, that was my primary motivation, as money and 15 min of fame was, but now that I know what I know, its not about the money, its about me, you and everyone.

I have been researching Rock Gate for 2 years heavily. The secret is not free energy, though its part of the secret. Yes, Ed's generator is a free energy device or over unity machine. Its what I call a pulse motor similiar to what others are doing right now. There are a thousand ways to harness the resonance around us. I called it the Universal magnetic current. Simply put, Ed cranked up his wheel to produce a current that went to the wood block with two terminals (Ed's capacitor) then to the electric motor which had a belt on it going down to a flywheel set up with a reciprocating rod attached to the crank shaft of the motor block. A complete cycle back to the rotation of the magnetic wheel. As the rpm's built up, so did the juice going to the electric motor resulting in more rpm's and an overabundance of energy that he could tap for cutting and moving his blocks.

I guess I should have introduced myself, I am sengA, male, I have problems like everyone else, I smoke , I drink, I over eat. I guess I am compulsive and seem to hyper focus while researching and pondering the universe. I am not a mathematician, or writer, though I am somewhat educated and got an A in physics 25 years ago. Im a litte rusty, but I have a clear understanding of the laws of energy conservation (broken).

Please excuse the grammer and spelling errors, its been awhile since I have wrote anything.

[Re: Anagram of A BOOK IN EVERY HOME](#)

by [senga](#) » Sat Dec 13, 2008 10:15 am

Once you understand how the bible should be read, then it is easy to read and understand what Ed wrote.... err vis versa, it was actually Ed's writting that clued me in on how to read the bible. I certainly read it in a different light now. And once you begin to understand what your reading and what they are really saying, it sends the mind running wild with excitment, sadness, and the undeniable cycle we are all in.

What book is in every home? What book is the most sold world wide? I'm not a bible thumper, in fact I always thought it was manipulated and didn't trust everything it has to say. Do I now, no. I won't deny there is much wisdom to be had and understood. However it is code talk in the bible, double speak. Seems the Pauline doctrine has infected most Christian churches today. 20,000 Christian sects all saying follow us we know best according to our interpetation. Simple put, they (current church leaders) say much of it wrong and will continue to do so up to the end. I take what Budda said, study all religeons! An open mind, willing to learn, is a much more powerful tool to enlightenment. The more information we can get our hands on and try to fit the pieces together is work. Its much easier to have your questions answered by dogma than it is to seek for yourself. For example, Where did we come from? Christian story is God made Adam poof he was here like magic. Takes a rib and poof makes Eve, they have babies and thats how we got here. Simple eh? Too simple, scientifically impossible (as it takes at least 60 couples to make a healthy gene pool able to sustian itself without birth defects which would ultimately lead to the extinction of ourselves before mankind would even be able to get off the ground and develop civilization.) Yet the thumpers will cling to Adam and Eve with such religeous vigor, they have trapped themselves in thier own dogma. How is one able to learn in this fashion? Many have left churches becuase of dogma because thier common sense gets the better of them, they end up in a non denominational church that takes all in, but many of those churches run into the same problems as mis interpetation of the Word creeps in and causes divisions and splits. I have talked to 3 people in the last 3 months who are in the middle of dogma battles within the congregation and between its leaders. Why does it have to be this way? I guess its just part of the process of seeking to understand, but this process should absolutely be one of common sense. After all keeping your witts about you is what leads to truth of anything.

A little poem I wrote today.
I love riddles, and I'd love to say.
Read it and ponder, think for a while.
When you get it you'll have a big smile.
If you don't get it that's OK,
I will reveal soon, but not today.

So you want the anagram you say
Maybe its acronyms that also play
I've toiled and labored to others dismay
It won't mean much to you anyway
Here it is I'll give you a clue.
Only because you ask, I give it to you.
What lives in water, and builds dams
The water, life created, by log jams
Who is so bizzy Turing around
Five states a monster, we are all bound
You work so hard to make the money
Like the bizzy bees, but you miss the honey.
Zion in Beaver schools let out.
Martin Luther he was a good crout.
Look in Ed's kitchen, there is more there
A battle cry, that none can compare.
I asked the Gardner, who cooks with fire
This is your tag, is this your desire?
reply
I wouldn't have labored all for you
If I didn't think you were able to come through.
The King of foo fighters is all its about
Come back to tell all, over glass of stout.
When have you measured with a good instrument
You will say "0 0" that what thee meant.

I know it don't mean... much to you.
But in due time.... you will know this clue.

ResidentEx wrote: This riddle reminds me that Mother seemed to be saying, tonight, that, when it all comes down to it, almost everything can be summed-up as a special, or specific tone/note. That, once you know this simple tone/note, things will open-up to you because you will have proven that, even with the loss of huge libraries of thought, knowledge, and Wisdom, we were able to discern that the important thing was this note, for it is the note that Mother hums.

If we can find this note, we can synchronize with Mother.

This seems to be what I'm getting, anyway.

Could the real honey of the bee-hive be the hum of the bee hive?

The 'B' note?

~Kenny

What you ask of me, ye shall receive
Hope this simple riddle will give you reprieve.

I would love to sit down and just spill my guts
But forced to write poems, seems like I'm nuts

The poem I gave you is not what you think
Anagram of Ed's book, I know it stinks.

Once over the smell, sweet as honey
Beavers are bizzy, that's so funny.

But since you ask, Kenny, I will reply,
A tid bit for you, to make your head fry.

Though good observation and referring to note(s)
Peter went swimming WITH his coat!

You want tones that ye doesth seek
1 and 7 have been secretly meek

Whats in our face is not always there
Eyes and ears, an old way to stare

17 is big, and will clear this mess
But it's not all, I do confess

So big, in so many ways
Too many too count, I don't have enough days.

What you seek as one, is always two
Once understood, no choice feel blue.

After you weep and get it all out.
A new man is born full of clout.

Your mind, body and soul go off reeling.
New thoughts, actions, desires, a new feeling

When you come down and it all sinks in
No choice but to tell others, where you been.

I have always wanted to understand,
I got more than I bargain for, I'm alone at the strand.

A burden on my shoulders, grows heavier everyday
As I sit here and watch man go further astray.

There! I told you, all you anti gravity freaks.
Now be careful crossing raging creeks.

Better to build boats, bridges over water
Than build flying machines and become cannon fodder.

For in this riddle, lies your fate.
Clearly encompassed at Rock Gate.

Peace, Love and have a good day.

Mr. X Kenny

That be some mighty fine cheese
Some food for thought if you please
Very good now look over here
Cheesy cheese balls those little spheres

I like Edam how about you
If you Made some, what would you do?

Ring twice the bell for dinner time
Could you spare me? I don't have a dime

Would you let me sit at your table?
Have 2 slices? I am able

Pass the bread I need 2 of those.
My grilled cheese on Ed's stove
Fry you up some vitals, it looks low class
There good ole units made in Mass.

Feeding your brain, that's what it about
On Ed's clues, I have no doubt

Doubt is for weaklings I do declare
Life can suck it may not seem fare

Why would you need faith if you know
Faith is for suckers when the cock crows.

When you measure you know what's true
Faith no longer required, sing hall laaalooo ya

For God knows what's in your heart
So watch your life or you'll be a big fart
Some noxious gas floating around
Terminally mental you'll be bound.

The warnings I make are quite clear
I left them for you my sweet deer

I am tired, been busy on the attack
How many times have I told you all.....
Don't look back!

In this riddle lies your fate
Not much time it's the date

You Made Edam I have too
There one in the same, it's so true.

Its great cheese have no doubts
I will be here to help you out.

Peace and Love

Ryan wrote: Senga, I'm trying to figure out your poem but no luck yet... maybe another hint?

On another note, I don't think I'll be purchasing Ed Marlinski's book as it seems quite unlikely that Ed used an Enigma machine to put codes in his writings. I'm not saying it's not possible, but I think my money could be better spent elsewhere.

Ed probably would have ended up in jail if he had an Enigma machine or caught with one. Of any kind, even on paper. He didn't need one anyways. He did leave us clues that are not that hard to figure out and certainly didn't want to make it impossible which encryption does unless you have a specific key. I will just say there are parallels to that statement as "one who holds the key" I can say the whole place is encrypted. One just needs to be persistent. Remember he was man without a home, countries ravaged, ww1 and 2. Then comes Communist Russia and Ed would never do anything that may look like he was a spy. He greatly valued his freedom and independence and would have never done anything of the tinnest nature to jeopardize that. He had a mission to accomplish, and nothing was going to stop him. So his MO was to stay cool calm collective obscure safe under any circumstance. I won't tell you not to read something as something may be gained, but the MO of Ed's writing is double speak.

Hope this helps you on your journey.

*Ryan wrote:*Who's "Mr. X Kenny"?

Are you just making these poems up or did you already have them written? I'm doing my best to figure them out...

I make them as I go,
You say hmmm so, so
Am I supposed to believe this stuff
Who is senga, talking all this fluff
If you don't believe me thats just fine
I do don't care, I got my water wine.
I am only here to help my friend
Maybe you should listen to Ken
Please take no offense, I have to do
The only way, to get through to you
Sorry if I have to talk this way
Knowledge burdens, I have to say
I am only trying to make a path
So you don't go crazy doing the math.
I don't make this up as you can see
Much behind it, the knowledge tree.
So its for you, so all can know
Go ahead and ask Mr. joe blow
You are already, don't have a doubt
No more questions, whats its about.
I gave you all you need
Now fry your brain, and feed feed feed.

Regards
senga

I don't expect you to get now
I won't reveal this sacred cow
When the time is right you'll see
You will know, its the way it has to be.

Re: Perfect Harmonics

by [senga](#) » Sun Dec 21, 2008 11:51 am

[quote="flatstick"]mk1 is definitely right - but this all has been covered within the video also (finding prime quadruplets etc)

$5+8 = 13$ (the first overtone of the 1'st after which everything multiplies and you can get the fibonacci series $((\sqrt{5}+1)/2)$.

From here starts the ring modulation (4 times) and you can get the fractals and dna patterning etc in my opinion.

(first we learn to add up from past events, then we have the fibonacci series start..

anyway, the function of pi and phi is

http://en.wikipedia.org/wiki/Uniform_circular_motion (see the picture there - you get swastika from it also and now you know the origins. check out playing card suits and plot them into the "seven seals" story from the bible (or the whore of babylon etc)

It is very important to know the resonance points (2012) because then you can know the past, the present (haha, just one second or whatever time unit late) and the future. this is why I don't believe in free will. So. pi is the meaning, phi is the function of time, derived from the pi. (There is no point to seek the ending from a pi, because you are chasing your own tail. If or when one happens to find it, the phi-function has efficiently made a step ahead; "and the realization - the heureka of "should've known it!" will apply".

Howdy, good stuff Flatstick
Sorry for the poems, I'm not a dick
So Hear ya go off top my head.
More food for thought more of Ed's bread

Add Ed's letters and you shall see
The D is missing why that be?

Bad Love, it tells a tale
Ba Love, evil bastards will fail.

For they change it, to steer it thier way
We are too smart for deceptive game play

For they knew would come a day

They fell in Ed's trap, you could say

1 six and 2 what it reveals
Phi rounded up, he carry's God's seal

8 and 13 you all know
Divine proportion makes it all go

Days in a year divided by thee
The number 225 you shall see.

Who's square root is only 15
Another secret, know what I mean?

August 13th is 225
8 and 13 that's not jive.

Listen careful to what I say
Then you'll understand, it really is phi day.

Your as smart as fibonikki that great man
Who discovered part of God's great plan

Sound, light and matter its all the same
Universal ratios will conscious gain

So much more that meets the eye
Find out much more you will also cry

Time and space they are one
Black Hole sound it's the gun

Filling space with the new beginnings
The Old torn up, no more innings

The game for mass has come to an end
Torn back to energy, to be our friend

Universal constants from all around
Made up by vibration,
Black holes combined sound

Filling the universe, putting together
The mass in hand, defining matter

For if this truth did not exist

Falling apart would insist.

Once you understand your hearts desire
Without the constants, no cozy camp fire.

Peace and Love

*Ryan wrote:*Senga,

That's ok if you speak in riddle
I think I understand a little
Ed revealed to those who would listen

all the others would be missin'
You seem like you know what you're talking about
The information you have, you don't want to shout
I may be new at this game,
you may not recognize my name,
But I am not dumb,
nor am I a bum.
I believe I have discovered a clue,
it may not be known, even to you
and let me say, I disagree with DePew.

The cover of "Magnetic Current" - yes, that book,
is where I'd recommend to look.

Regards,

Ryan

Hello Ryan!

This was great, gave me a great laugh! Good stuff, very creative.

Regards,
Omar

I agree and disagree Ryan, so I wrote a poem... no kidding! lol I know, it seems dorkish,
but its what I'm doing so bare with me.
I will busy over the holidays so it may take a while to get back to anyone.

A poem titled "Water Fire and Life"

I seen that before, down in the river
Deep dark and cold, make you shiver
Canoe in the water, and my paddle
That little symbol, I doth straddle

I cross this gentle river, with all my might
I can't get anywhere before the night
I hate the dam dark, it's so cold out too
Sweet Sixteen how I'm missing you

Hello, some more cheese for you all.

Thought I'd stop by
And give you some bread.
Before I lose it out of my head.

I know who you speak of, that John Depew
Double S inverted and askew

What he showed me makes much sense
So did MIT Ferro fluid experiments

Amazing coincidence I must confess
Its everywhere even my white dress

This motif makes violins cry
But you know that, what's based on phi

It's more than that as you shall see
Cold rivers and wombs always be.

What's in the micro can be shown
Can be manipulated and over blown

A common motif all over the place
Driven to obscurity and if front of your face

Why don't you see it, I don't know why?
An architectural motif left to die.

I love music, love how it flows
Just like water it's the way it goes

Wind water and ether to make the fire
Add some frequency to make it go higher

Cutting threw stone like a hot knife in butter
Seeing it done would make you stutter.

Hot as the sun it doth get
Cool to the touch, Holy shit!

Ed's "At work" sit and think
Fry your brain till you bink

It's a lever? A Swing on Ed's Porch? .. A

No..., yes, its both, an HHO torch

Twist and turn line up anyway
A clever device to ease his workday

Hit your head and spill your bong water!
Hydrogen torch! cut stones! slaughtered!

The only compression marks you do see
Ed's dotted line, where he had bust thee.

Oh how clever Ed! carving the stars
Can I use that H₂O plasma to run my car?

"Moist certainly" as curly on 3 stooges would say
I will forever more be looking at water a different way

But this is shallow as you shall see
Much more than this, yes indeed

From life to death it serves both ends
Water has memory, that does not bend
Fall in and drowned, to "My water broke"
That's when you know you were a different bloke.

Its from the truth you shall see
Sacred Double S's, Sacred femin nee

Look in old books and bibles you'll see
S to F was a common disease

Not in the beginning, nor the end
Those little ss, you look for the trend.

A double edge sword that cuts with truth
Or used as a weapon, very uncouth

Heal your neighbors and your friends
Its pretty neat stuff, it makes light bend

Physical, mental and spiritual too
God's radio field is defining you

Thoughts actions and dreams deep in there
All those times you said, life's not fair
Recorded magnetically for all to see

For the flashback, history repeats

It is what it is and is part of the clue
The waters bare forth reps of the glue
For if you know, how water flows
You would know, how stars glow

From fractal mathematics it does all come
But you all know that, this is for fun

The universal constant, in front of your face
Energy and mass, must react in this place

For we are in a state of decay
I know it sucks, it has to be this way.

Peace and Love
senga

*Ryan wrote:*Senga,

Thanks for the poems.

So it seems you're saying Ed used an HHO torch. Very interesting, and I guess it would explain why some people say there are no cut marks on the coral.

I have lots of questions... hopefully you can answer this one since its not directly related to your poems - Are there clues in Ed's original writings that aren't in other versions such as the versions posted on the internet. I have heard that there are spelling errors and things like that and I'm worried that these clues may not show up on the online versions.

I am probably way off here but I think you may have made an error in one of your poems.

I do don't care, I got my water wine.

Should this be "I don not care"? I'm probably way off, but maybe you know what I mean.

Regards

Your welcome, yes torch, no chisel marks, correct.

No worries on the writings and various misspellings.

It's the greater context of the message you need to focus on.

As with the bible or any ancient writings that seem cryptic, many focus on a single word, was it that word, or did it mean this, is it a misspelled word on purpose revealing a code etc.

As with any religious text, they may happen to change slightly from opportunities those individuals had too express their interpretations and had the position in power to do so. I did not compare what you ask, but any versions I read are saying the same thing, mistakes or no mistakes. It is possible that there is clues made to look as mistakes for us to decipher in Ed's writing, however I mostly attribute it to typos by the typist and there are only a few. I think the document would have been more riddled with on purpose mistakes so one would take notice and investigate those typos. I however simply didn't focus on that. The code is the document itself in the manner in which it is read and understood. It is a matter of knowing how to read it. I suspect no one knows how to read it. It could be coded mathematically, and if it were, I think it would be rather simple, Ed didn't need to use enigma machine, but simple algorithm would most likely apply. However I get the feeling this is not the case as any code found would most likely put his residence status in jeopardy because of the time it was.

We all know the bible is coded mathematically and the freemasons may have embellished it for the 1611 version. As 47 scholars, math guys, most all freemasons and with Francis Bacon the leading numerologist of the day, yea, I would say there is a numerical code there. Did the masons do it, I think it was already done by those who came before them. Anyways I feel you don't really need to get so much into that, the context of what these religious documents are really saying is largely lost. It's only a matter of understand how to read it that reveals the true understanding of the passages.

I do don't care. I have my water wine.

This is a way to have a greater message from a simple, but yet obscure sentence.

I do care that you know, and should know the future of your soul.

I don't care for those who ridicule, dismiss and or those who minds are trapped, i.e. closed.

I got my water, the knowledge, which will lead you to the wine. Or the knowledge of water to wine. After all this is about water in so many ways, that leads one to the sweetness of wine. Or once you drink the water, and know, your now drinking wine. Changing of water to wine at the wedding. You drink water here, but in the heavenly planes you're drinking the sweetest wine. I could actually write 12 or 13 pages on this on passage I made up for you to read.

I do don't care. I have my water wine.

Peace, Love on earth

*ResidentEx wrote:*Senga,

If I can pretend I know what you're talking about, for a moment...

Are two... interpretations being used, or just/mainly one? I guess when it comes to NT, two are probably being used because of the times, but I'm not sure. One talks to me more than the other, but something you said didn't work that way, it seemed, yet worked via the other.

Thanks!

Peace

~XKenny

Sorry I missed ya, all have double and even sometimes triple meanings, mirror effect, and what seems like oxy morons to what we know and are taught and on and on etc.. The first poems are the most difficult and you probably won't understand them for along time until more information comes out. All other poems are building towards the meaning of the first two first meanings of the two to understand the first. If you know the first then two becomes first and first becomes two, after all it is the first two that become two, they are the two first of the first two. he he...

Some more of that food, that cheese ball!

There is wine, but it is reserved for the wedding and to those that could make it. Your all invited, but many don't listen to directions well, and when they showed up they were filthy, they really needed to wash. I couldn't allow them in. They should have washed up before they came then put on their wedding attire so it was clean. And you better have your own clothing not someone else's! I don't like food all over the mouths of children nor on their clothing, when is mamma gonna wipe that child's face, my, my..... clothes with stains on them, it makes for bad pictures if you know what I mean. I use spray n wash, then scrub and rinse, you can get them out if you try. Anyways, on your way here, be careful, the popular directions to go may not always get you here. There has been some bad flooding and the land is changing, so watch the waterways when you cross them, and make sure you have a reliable boat and the expertise knowledge to sail it, lest you be swept away. Same for bridges, there tends to be high winds and sudden storms that blow up, its easy to get swept off and fall in the water, if you capsize or fall, you drown, sorry, and that's a pain, cuz you end up getting flushed back out into the ocean and its hell swimming back up river.

Anyways I wanted to write another poem

Titled – Respect

Some of you been to Rock Gate
You probably paid the going rate

Admission is what he doth reveal
His confession, it is surreal

Drops of water fall from mine eyes
Spheres fall below, It makes me cry

Acknowledgement of the truth you see
Left for us, that part is free

Oh you should have the deepest admiration
Does Ed get that?, It is his expectation.

Pay and go in, take that path
With admiration, and your math

Earth 21 you travel to the door

Stop, drop below, one knee to the floor

Take off your hat
You can do that

Drop in half, your head must go
The water pipe, bow below
Please, please please! I do bellow!
Old King is he, RESPECT this fellow!

The water pipe, its 10 cents
Ed told you bout corner penance

Get up and be on your way
Smile on his face you made his day

So much time gone and no respect
No one new how to read I suspect!

There is more here than meets the eye
Everyone knows that, that's why ask why
Give respect, you must surely try.
Its what Ed's wants, while in miam i
It's the best to do before you fly
You had better tell others, I do decry

Because now you know and its your duty
Do him righteous, or I may get moody

A special man, tall es of love turns blue
What a tale true, tale vail a gift, he has edam for you.

A special sight will come too you
Peircing eyes, you'll see right through

Subject to ridicule have no doubts
They will try to destroy our clout

Don't worry Ed I am here
Your Sweet 17 is very near

Crazy Ed riding his Rusty bike
Who are they to drive that spike?

I will not stand for Ed called crack pot
Or speculative ramblings, fit in a slot

He was very special you don't understand
Ed was telling us time, I make my stand

Did you see the stars last month?
Jupiter, Saturn Ed did done eth

November winds can blow late
Look there for the date
December one is special too
A special number just for you.

Did you hear that bell just ring?
Two times makes one, it went ding ding.

The time is NOW, it's all above
Time to fly free, like the dove

Feel something pressing on your brain
I know you all feel like your going insane

Ed's work describes it now.
When you see it holy cow!
Its all there oddly enough
I know this seems like crazy stuff

Monuments, moons, foretelling future
It's right now! Its mankind's soocher!

Heal the wounds of present and past
Yes I have come..... yes at last.

Peace, Love and Happy new year

senga

Sorry for the obscurity ya'll but its all there if you research. I don't mean to have an attitude but its my nature and I'm working on it. I have horrible habbits and I find myself battling between my ego and trying to be humble. Its been a difficult journey, I imagine it will be for most.

If I can pretend I know what you're talking about, for a moment...

Are two... interpretations being used, or just/mainly one? I guess when it comes to NT, two are probably being used because of the times, but I'm not sure. One talks to me more than the other, but something you said didn't work that way, it seemed, yet worked via the other.

Thanks!

Peace
~XKenny

Oh geeze, I can't read sometimes, lol. Yes the NT and old have a deeper message that is not being interpreted at all. So what we know is one way and what most Christian churches teach. I'll just say.. there is another way to read it. I'll just say... Giza!

I wrote this one for some dude named Searle who emailed me from this forum yesterday. Thought I put it on for everone if interested.

Title - Rock Gate Fate

Ed's rock gate, a prophecy in stone
So profound it will chill you to the bone
So little time and much to do
Oh my sweet sixteen, how I love you
Wash your clothes and clean up my dear
For you know the wedding draws near
I hope your ready and have no doubts
Else rejected at the altar, you have no clout

Congradulations you filled in the cracks
You know dam well now, there's no turning back
Remember Lot's wife, that pillar of salt
That can be you, and it will be your fault
Oh how I miss thee, I can't wait
I can only hope and pray, you choose the right fate.

*Ryan wrote:*Senga,

I noticed there were references to the Bible in some of your poems. You mention that Peter went swimming WITH his coat, which is a reference to John 21. This is when the 153 fishes is mentioned. I am guessing that him putting on his coat is an allegory which represents something else. Right now I don't know but I'm very curious.

In your last poem you refered to Lot's wife turning into a pillar of salt. This happened because she turned and looked back. This poem seems fairly straight forward but I'm not getting the deeper meaning.

Anyways, Happy New Year

Ryan

Hello Ryan, yes you are correct it is an allegory for something else as is lots wife looking back. Basically once the knowledge understood, it's a warning, that there is no longing for this world and what's in it, lest you be a pillar of salt . Basically Lot's wife longed for things here and was rejected, didn't continue one with the rest etc. Peter..... how far did he swim?

Tired and its late
Happy New Year

NOBOODI wrote:hi senga

im not christian. do i need the bible to understand all this?

thanks!

It helps as with other documents, but all are really saying the same thing or have the same underlying message. In the Bible its largely hidden and not talked about and this is what Ed was eventually talking about or leading us to, the bible and the stories in it. I can't find any data that suggest Ed went to a Christian church or any for that matter, which implies and goes with Ed's teachings.... basically to think for yourself, or why would you want to wear another man's cloths. Its a journey we all have to do and you may be alone or certianly feel like it with those around you. But your not. Anyways Ed was in America he was refering to the bible, and that is very apparent in certian circumstances, but its not the only teachings Ed implied. I'll just say research the flowers in the feast of love table.

[quote="TheAmericanist"]I'll be honest with you Senga... I've only read limited selections of the Bible. My instincts led me to set it aside given the fact our "Good Book" was pieced together by fallible men who mainly fueled ego, and in this response caused tens of millions of deaths. The more you make references to it though, the more I become intrigued by any coded messages it details (i.e. precession/ manipulating H2O). There are things we need to know in order to explain to family members and friends entranced by only the half-truths at this point. It might not be your duty, but perhaps a calling of yours to steer your fellow man in the right direction, away from any folklore, tangents, and/ or myths. I refer mainly to the passages with specific numbers (degrees) as well as the true path for us to follow. What Ed envisioned as part of the whole. Let me also be the first to say... Your insight and direct approach would be greatly appreciated!

Apocalypse Please

Same as you, my instincts led me to set it aside for years til recently. I don't want to say the book caused death, but it very well may have led to that, as zealous historical leaders used it to justify mass murder and horrible repression of thier fellow man. I agree it has been tampered with and things or stories altered for sure. However, the underlying message is left intact, maybe because those in power themselves didn't see it and felt perhaps no need to mess with this obscure verse or that because they didn't understand it themselves and or the obscurity probably was used to thier advantage. Usually its just misinturpetion that is applied for an advantage over others. They were more interested in power than decoding the hidden meanings. Even if your the pope, if your power hungry you ain't gonna get it, or may not want to get it.

We know lots of things happened over the last 2000 years that certianly points to manipulation for someone's benifit. Possibly our own. I don't know, but it seems apparent to me now it had to be this way. Fortunately, preachers often paint themselves into a corner by inquiring minds, and when not satisfied the seeking minds leave to seek another man's cloths to wear. In any case there are more than one path, but I would say they are narrow.

I'm afraid I have to steer you towards the folklore and myths, the mythos behind the myths, because these are the instruments that have carried the grail. It was a way to store information, it was a way to pass that "message" down generations so it wouldn't be lost, but rather understood someday agian. Just like Noah's ark, we all heard it as a child, a simple story, we all know it,.....we all know it? Do we really know it? So I wrote you a poem.

Apocalypse please! Lift the vail!
Then you will understand, the Holy Grail

This is one deep rabbit hole my friend
My will is to tell slowly I will not bend

It's for your protection you will see
Soon enough you will know all that be

That Good Book is like the others
Hidden meanings for my brothers

Wrongly read and spewed out loud
Over mankind a dirty smoke cloud

Misused to kill and dominate man
Their words are crap from the trash can

Think for yourself that's what I been praying

Don't wear another man's clothes, Ed's been saying

Your on the right track do not worry
Follow along and avoid God's furry

I imagine now it had to be this way
To protect the message for a later day

It always comes out near the end
It must be, for mankind to mend

I'm not thumper if you read my 1st post
But you need it now to understand the most

All books say the same thing now
When you read you will say, "Oh wow"

You know Noah's ark from a child
A folk tale riddle that's pretty wild

Read it closely, and you will find
Weird and cryptic words fill your mind

Why does the raven fly to and fro?
Why did the dove come back and go

Made it to land but refuse to leave
40 days Noah on the boat did cleave

We think of the story but always leave out
Minor details that will give you doubt

Was that 2 of every kind
Or seven, never mind!

Was it a true story or a tale?
Maybe both! LATVIA
A riddle perhaps to lift the veil..... E L

A tale is a veil the veil hides the tale.
Tale true veil, veil true tale
Put some water in your pale!
Prep your boat get ready to sail!

They don't like to mention nor explain
Because they can't and bring on pain

Avoid questions that preachers try
Dummy down souls, it makes me cry
Who are they to tell you why
They keep you grounded, as not to fly

All are not bad and help you to seek
They are trying their best to stay meek
It's Ok to listen to all
But use your mind so you don't fall

I guess that's why you're here seeking
Shall I lift the veil? Are you peeking?

I know you seek and I understand your pain
That's why tell slowly, so it won't be in vain

I've given you numbers in my words
Have you not understood milk to curds?

Read all data from all books
Misread and quoted from powerful crooks

It's all there if you seek
Left for you, just stay meek

Deception of man it's their game
Apocalypse please! Say my name!

Ryan wrote:

Add Ed's letters and you shall see
The D is missing why that be?

I know that the D is missing off of the Obelisk, which is probably what you are referring to. I haven't figured out why it is missing though... I guess you are saying that Ed removed it purposefully.

I understand how August 13th is "Phi Day", but I'm unsure how it relates to Ed and Coral Castle. Interesting stuff though.

I am very interested in your poems Senga. Keep them coming

Peace 68(9)1

Ed didn't remove the D purposefully, I think it was just time for it to fall off. Perhaps he made it so it would in the future. As far as I see they just splotched some cement up there and called it good. I see they fixed the other letters as they were damaged. I don't know why the owners would not replace the D unless they like what it read now. In any case it helped me to find some things.

Peace

Re: The holder.

by [senga](#) » Mon Jan 05, 2009 2:19 pm

Hello, I had talked to a gentlemen who grew up living very near rock gate. He told me as kids that they would run around the property and play, this is after Ed's death in 1951. He had told me that they had found a square pit out back some ways from the castle. It was heavily overgrown, but they managed to climb down in this 3 foot deep pit that was about 10x10 feet. He said they had found large U shaped steel coated with glass and wrapped in copper wire. He said that there was 4 of these devices and it sounds much like the perpetual motion holder and its design. The gentleman also explained that they were not allowed over there and were not supposed to play over there, but upon returning home had told his father about the large steel parts wrapped in glass and copper wire.

Apparently the father went over to investigate and seen the devices down in the pit. He then called the authorities, who in turn called the military for whatever reason. The military did show up with 40 men and trucks whereby the boy in this story witness them carrying off Ed's equipment. This may also account for the pictures some have with a soldier with a M-16 standing inside rock gate and everything appears overgrown or neglected. It may be related to this event.

Now you have to ask yourself what business is it of the militaries to come in and take his equipment? They obviously new something and took action to prevent anyone from veiwing his devices. I think the military itself was in the process of developing anti gravity technology and particle beam weapons or death rays described and designed by

Tesla. This is obviously a very sensitive subject to the military. Ask Joe Bullard what Jeb Bush did when Bullard started talking about the Ed's magnetic wheel, pretty much the conversation was over at that point, as Jeb Bush immediately turned and walked away and Bullard was instructed that this interview was over. I think that's how it went, it's been awhile since I listened to Bullard's story about the J. Bush meeting.

Peace

[Re: Proof of Water in the Flywheel](#)

by [senga](#) » Wed Jan 07, 2009 9:00 pm

No water in the flywheel. First off, it would fly out because of centrifugal force as rpm gathered, (common sense) second, there are holes in the bottom clearly visible, perhaps not in your pics, but there is. So no, no water in flywheel.

This is an over unity device Ed used to create his own electricity, as I have said and explained how it worked in my first post. The missing item is the copper coils, the item shown on the famous Ed turning his machine photo. If you notice on that photo the coil is present, next to the magnet wheel, today it's nowhere to be found, as if someone removed it. There is one shown in the photo but most likely Ed had them around the magnet wheel, how many I don't know, but I would guess 4 or more. Someone also put a piece of wire down in the bowl to make it look like it was just an electric motor or Faraday wheel. And if it were a hand crank generator relying on someone to turn it to make electricity, I think it would rather be hard to hand crank, run outside do your thing before the magnet wheel slowed to stop as we all know forcing magnets over copper creates electricity, yes, but also equivalent physical resistance. Simply put, Ed cranked it up to produce a current through the coil to the wood block with 2 terminals (Ed's capacitor) then to the electric motor, which I believe had a belt pulley on it, though I'm not sure, it could have been direct drive set up as Ed seemed to have 90 degree gears laying around the machine. Anyways once fired up, the electric motor was powered by the magnetic wheel, the magnetic wheel powered by the electric motor. The results produced more out than was going in, it was a perpetual motion device. Some will say there is no such thing as perpetual motion, and they are right, the energy has to come from somewhere, and it does, it's all around you passing through you as it does with magnets. Magnets are like a lens that focus in a sense. Focusing what is already around you, holding you, and everything else together. Magnets merely react with the earth's magnetic field, the earth is not the source of a magnet's magnetism.

senga

I would pay attention to what flatstick referred to about water. Ed used his homemade electricity to manipulate water which I have explained in one of my poems on how he cut

the blocks. Once you have a power source you can tune its output for different purposes.

There is a couple of you tube videos with various motors similar to Ed's. I will try to find and link.

[You can always add one..... if you want](#)

by [senga](#) » Fri Jan 16, 2009 6:34 pm

I been out for a while, I caught a bad cold and I don't take care of myself as I should. I have more to post shortly and will try to answer some questions that been lingering. Here a poem, its a little long winded.

Add One

You can always add one
Try it for fun

Your so close
Add one for the most

It's the key you been missin
Adding one part of my mission

I must tell you this today
Time is ticking I have to say

I have already given you the clue
Agnes 16 adding one for you

Mk1 already said it
Start here earn your credit

A notes are a funny thing
Try adding one, ding ding ding

Square it and pair it you shall see
Latitudes lines days year it will be

195 south 195 north is where it all happens
Above or below to cold for snakes nappin

364 days a year it seems upside down
Consciousness driven backwards town

More of Ed's numbers in his obelisk
To wash and clean to avoid the risk

viscu piscus Ring that bell twice
Draw 2 circles that's real nice

2 in the middle 1 one on each side
A special number go for a ride

If you know this number you shall see
10 similarities of all that be

A key to pi yes indeed
Agnes feast day it shall be

Flip flop 2, around where 1
Another number Ed had done

Its all around Its hard to believe
How many definitions for TB?

Ring it twice and one for luck
15 squared number of the buck

1, 5 and 3 little tricks you see
15 x 3 is 4 and 5 some honey bees

51 degrees x 3 angles 1, 5 and 3
Sum of all numbers cubed it always be

153, 17 and 9 all the same dime
You been down that road many of time

Cast the primes to the right
I am ready for this fish to fight

My net will fill up, I gave you a sign
Net of primes and fishes I do mine

99 is the number to be
God has a penny just for thee

100 percent I can now claim

My call to victory, my call to fame

Sweet sixteen I'll add that one
Ring it twice
Golathagoes hill where it was done

Add it on that way or 17 the other
Ring that twice Agnes your brother

Skull and bones you bastards stink
Means to an end, you guys are dinks

For I will deep freeze your pathetic butts
Parading around like satan's sluts

No one gave you that right, I have come back
Fire from mine eyes you will crack

I am sick and tired demented male whores
I will cast you off your not welcome here no more

Go hide if you think you can
Caves and holes I know you man

Mine blue eyes will pierce your skull
Sword of truth cuts it won't be dull

There is no escape I will promise you that
This is not a game of tit for tat

The buck stops here a healthy stag
When I'm done with you, my ass rag

Pause... whoooooaaaaaaaaa.....shhhh OK
Those guys really piss me off! Anyways

You guys are so close
Listen carefully for the most

Eleven eleven who's in heaven
All those that eat bread unleaven

I gave you the number that you did need

Adding one for the host yes indeed

Agnes gave you what you seek
Simple numbers for the meek

What resonates chamber the of king
Like a bell remember ding ding

Lui D already said the word gate
What note, number key to your fate?

Do the math and multiply thee
Ed's first numbers left for me

Agnes plus 1 x Ed's first numbers
Should awaken you from your slumbers

121 is my total name
121 years Ed in this game

193 honey combs and bees
Flow from my mouth knowledge tree

For if you know what is Rock Gate
Granite leaf and shafts tis your fate

I said before I will again have to say
Giza my friends its starting today

Prophecies in stone waiting for you
Holding back I really want too

Not that I'm selfish or secrets keep
I have a feeling they'll be calling me creep

Lidless coffers 6 inch thick sides
7 inch floor thickness Ed did cry

Mutliply thee and you shall see
Some of all angels that will be

Its also my bee day, day I was born
6 one and 7 spring time adorn

Take a chance and roll 2 dice
21 total all sides that nice

8 points on each it's a cube
88 keys on my piano, dude

Eleven more the best you can be
Get God's penny do not flee from me
100 percent you and you and she!

64 is the checkers black and white
Freemason flooring, blood spill they might

Death and rebirth it does all means
Bible stories, reincarnation and your genes

God has a penny just for you
You'll be one and complete instead of two

I guess I never told you about adding 1
A little trick bees told me how it was done

I'll have to write another I suppose
Got a bad cold I got to blow my nose

Ahhhhhh chuuuuuuuuuuu

[Re: You can always add one..... if you want](#)

by [senga](#) » Sun Jan 18, 2009 12:46 pm

*ResidentEx wrote:*I'm sorry, but I think I'm lost...

And I also have a bad cold. 'Haven't had one, really, in several years. Not like this. If this is the way colds are going to be, I definitely don't want to catch the flu, especially as how I don't trust the source anymore...

Omar, if you figure it out help some of us out 'cause my head just won't do the math anymore. I'm wondering if this dog can learn anymore tricks...

Good poem, Senga! (Although I really don't understand it...) Also, happy belated birthday!

~KennyEx

I guess if I miss this train, I'll hopefully see you guys in 26,000 years.

Your cold will be better soon, its a nasty one, it has a tendency to turn into bacterial infection so beware. It may require the use of antibiotics to get rid of. If it lingers it can affect your heart and do damage.

You can't do math anymore? Add, subtract, multiply, divide? Not that hard, read slowly and write the numbers down, play with it.

Poems are wrote so you won't understand right now, be patient. Your not missing any train unless you chose too.

As far as my birthday, it is 6171965 on the 168th day of the year i was born. I'll take that birthday happy belated though. I'm not sure what your implying, I am not Ed, but I feel like I channel him sometimes, I'm not a clarvoyant or nothing as far as I know. I will say I am connected through the numbers to all this.

Anyways I wrote another poem, I wrote this for Omar some time last week and forgot about it. It was a response to his compliment to my poem.

The Obelisk

Omar, now your talking wise man
Thank you, compliment, you a fan?

Obelisk talks if you do your math
It can lead you to the straight path

Rod of Iron, staff in your hand
Welcome to the promised land

Numbers and letters much more here
I only gave you teaser, look more there

One eleven knowledge is mighty
Tread the knowledge must go lightly

One Oh five is a cool address
How many times have I said white dress?

Harmonies playing in your head
Musical universe make your bed

I'd rather rest and sleep in peace
No rest for wicked, that prickly fleece

1 and 10, you have heard
add one for keeper of the bird

Numbers of creation where you walk
Look at the earth before you talk

Looking for primes you can add one
Square root of 5 plus one for the sun

Divide by 2 you know what's golden
Prophecy revealed I be Holden

3114 BC Aug. 14th Mayans did say
Age for us began plus one after phi day

2012 calculate this math
Maya Hebrew makes a path

Divide by Phi and you shall see
Hebrew numbers knowledge tree

Greek and English, Latin too
Ed had left it just for you

Treading waters to my water broke
You have heard me say, you were a different folk

Don't worry about the bible; God's hand is in there
Like all the others, go ahead and read if you care

A trap for evil in its own deception
How man got here and his conception

For even the deceivers are deceived
Old power whores crap they still cleave

Grow up old punks or else my wrath
Wind and water will blow you off this path

If you like blood and to toil and sweat
I will oblige you and you will lose that bet

Dirty fingernails take lifetimes to clean
Come back in front of me better gleam

That's your choice to leave or to stay
No one's making you be this way

I will warn you, time limit, on this fall
Time run out, you have never existed at all

So be it! if you cannot look at my face
So be it! If you cannot handle grace
I will grant your wish, you made your case
Bye bye, As if you were never here in the first place

I recycle it's a good thing
Hear any bells go ding ding?

Butterflies in space do their affect
Do our faces? Do they reflect?

It is possible I suppose
Manipulate possible, create no no

We are from this place there is no doubt
Giants make mules you heard about

Aliens have problems living here
Magnetic environment the problem my dear

For if you are not from this place
DNA will start to unzip in a race

They create environment just for themselves
That's why they act like little elves

Giants, just another bipedal walking around
Big ole skeletons we have found

Small one big one medium too
Surviving and learning feeling blue

Much before us earth tells a tale
Giants turned demigods, they did fail

God's mathematical equation tells it all
Creation of us math drove the fall

It's the yin and yang, its how we learn
Human behavior like a fractal fern

Natural selection that's all it is
They didn't make it but we did

It was the flood they say that wiped them out
They didn't look ahead and had lost their clout

We were more scattered and fiddled about
Made beer, drank and figured them out

If they bleed they die, some knew that
Some say gods, straight out flat

We are not dumb, we never were
Always someone searching for cures

Use common sense it goes along way
You can figure it out I'll just say

Many skull size jump around
Depends on the planet how we were bound

Wasn't that Neanderthal pretty profound?
We lived at the same time, short was found

Did we push and move them about
Take their food and starve them out?

Oh no my friends it didn't work that way
Our mothers and fathers I will now say

For when we go through an event
The magnetic field can get bent

Sudden loss of mass or gain in such
New orbits, spins or sunlight can change DNA much

Looking for the Eve, carry your reed
It was all eve's bearing, life to new breed

Out with the old and in with the new
Old magnetic race nice knowing you

May not look much different or radical too
It doesn't matter, it progresses for you

The math dictates this progressiveness
Its consciousness evolving don't regress

Is there an escape in this is 3 D
It don't seem like it for you and me

We strive for the 4th, get me off this rock
Heaven is warm my feet no need socks

The least in heaven is greater than he
Agnes, beetles, snake and harrybug is she he

Stabbed in the neck, whore house crash
Jealous suitor fist do smash

Baptize with water wash away sin
Penance Corner is where you bin

So don't have children, not right now
Time of sorrow will kill pow pow

I hate the suffering as much as you do
That's why I reveal so you don't have to

We all will suffer this future prophecy
Not as bad if prepared like me

Physical mental spiritual too
Prepare yourselves times turn blue

Suffering is short for most of us here
People think they're lonely now,
Just wait my dear!

These tidal events happen again and again
Takes life quickly most everyone's kin

Ed's green man cometh and taketh away
Then spitting out veggies for a new day

Math in creation no reason to shame
Creation and evolution is one in the same

Argued to death, made to divide
Stupid preacher's scientist pride

Split the masses and the classes
Conquered souls rose colored glasses

Its all in the middle not tats for tits
Ed is telling you to use your wits

Aliens didn't need to come down and tell
We find on our own, five fingers ring bell

Playing with numbers on primitive levels
Algorithms drive nature's real life bevels

Missing links for you today
Truth to light awaken new day

Peace and Love

A-Scuffs wrote: Hello, senga.

I hope you're feeling better.

I've been reading your riddles and i'm not getting anything from them, perhaps this is because I am blind to the obvious, I can't tell if you're serious or you're playing with us all. I've noticed a few topics that crop up in your poems, ones I can understand, however nothing that takes me any closer to answers. If it's not too rude of me, I have a few questions for you, I hope you can help me.

Why are you using riddles?

You say time is running out and that you have to tell us, what's stopping you just coming out with it? I understand that perhaps for us to fully grasp 'it' we need to figure it for ourselves, I just feel I've looked at everything I can look at.

What am I adding one too?

The only thing I can think of with that is the Phi (adding one to the Sqrt of five, and divide by two)

How did you originally figure out what Ed had hidden?

Who are those people you were getting mad at in your penultimate poem?

Perhaps it was lazy of me to ask these, I've really tried to understand myself, I guess the gate is closed for me. Any response would be appreciated, I just hope you're allowed to answer some of them directly, another would riddle would be the death of me! Spill the beans!

Thank you, senga.

And P.S Sorry if I sound too forward, I'm hitting a brick wall. Or Gate.

EDIT: Haha, Omar, you're a brighter bulb than I! I guessed I should have waited before posting!

Yes, I noticed Anges too, Agnes Scuffs being Ed's "Sweet Sixteen" apparently. I am not sure what, if at all, it means anything. It's probably been said before, therefore making me look silly. But it's there now.

1. Thank you I am feeling a little better.
2. Not rude to ask, yes blind to the obvious
3. I have explained why I am using riddles, they are not that cryptic, I am saying much straight forward
4. Yourself, and I can think of alot of examples where 1 is used, primes, phi,Giza Sweet Sixteen etc.
5. Persistance, patience, experimentation,numerology, simple math, adding the coincidences etc.
4. Perhaps lazy....I don't think Try to understand more...the gate is open...another riddle won't kill you!.....I am spilling the beans
5. Not to forward, you said it, "Gate"
6. Agnes Scuffs..... "If I was talking about a girl I would have made enough money" or something to that effect. But it is about a girl, and a guy, one in the same, its the tale agnes scuffs

There seem to be a lot of similarities between what you are saying and Billy Yeager's ideas. Honey bees, 153 fishes, the bible... and others I forget right now. You're not Billy Yeager are you?

Also, I'm not sure what "Ed's first numbers" are. I'm guessing Agnes is 16 ... then add one = 17...

Regards

No I'm not Billy, that guys is pretty awesome though. Yea, honey and bees and all that, that is also in the "A BOOK IN EVERY HOME" and what book is in every home in America... mostly.. all hotel rooms anyways! Ed was in America for a reason. Ed's first numbers, 7129 Yes Agnes 16 plus 1 = 17 153 sacred geometry number also its the 153 masonry level which is represented in Ed's largest stone atop the king's coffer, the lambda sign or some may call it a square or the gable above the 5 granite slabs, the peak is at the 153 masonry level at Giza

Hello senga,

I understand that "viscu piscus" is "vesica piscis":

http://en.wikipedia.org/wiki/Vesica_piscis

There are various links at the bottom of that page, one of which is this one:
http://en.wikipedia.org/wiki/Catch_of_153_fish

Regards,
Omar

Yea, I kinda write these on the fly, I guess I should spell check! Yes 153 and all that as I mentioned and as you probably know its a sacred geometry number. And as I mentioned $17=153$ and 9.

Ring that bell twice, two intersecting spheres 1 of 1 ring 1 of the other 2 in the middle made of up both, 121 Agnes feast day, and more as I mentioned. Hey that's tomorrow.....

*Ryan wrote:*Senga,

The feast of St. Agnes is Jan. 21. Is this what you are referring to when you talk of a feast and that there isn't much time?

Edit - Upon further research it seems quite evident that you are talking about the wedding feast story in the bible(wedding of the lamb (St. Agnes))... I think. I'm still reading up on this.

Regards

Yes, you are correct 121, you got time....I'm sure of that... for now.

I often wondered if Ed wasn't God himself sometimes through this process. He lived like a monk, nobody knew anything about what he did other than build Rock Gate. Just very little information was out there about what he did in his off time, other than going to the

library. He is a hard guy to figure out, seemed like almost mystical or supernatural qualities about Ed and the whole picture here. I have come to the conclusion from things that I have found, things that happened in the future that Ed could not have known, been popping up as of late. I am over being freaked out over the coincidences. I think Ed was a great man along time ago as mentioned in one of the stories about Ed's Father or Grandfather visiting South American Indians and they told him that Ed was someone special, that came back to deliver a message or something to that effect. I would have dig through my piles of material but I believe that is the case. I do believe this is the case, Ed was in fact a great man, a king of old perhaps, who had a message to deliver and he seemed to know and realize this at a fairly early age. I do believe this was the entire focus of his life and he came to America and executed that plan flawlessly. I don't think he was the Almighty, but I think he's an angel or human of higher status that volunteered so to say. Only problem is, you don't remember a thing when your born into flesh, so Ed had to find himself.

Peace

Hi Senga,

I thought that the "Secret of the Universe" number was just Ed's citizenship number so therefore I didn't think it was related to the clues... interesting. I don't know if it is possible for Ed to somehow choose what his citizenship number was. So are you saying that the caller on the radio show was wrong or that Ed somehow chose these numbers?

Best regards

NO! Not is citizenship number. If it were it would be the miracle of miracles. Everything I know about those numbers, I don't see it possible. If it were the case however, I would fall out of my chair.....again.....

*Ryan wrote:*Senga,

"At Work" is an anagram for "Ark Two". Maybe this is related to Noah's Ark and how the animals went on two at a time? Thank you for pointing out the "tail vail" on the obelisk. I am wondering if Ed is specifically refering to the Noah's Ark Story.

The plant in the middle of the Feast of Love Table is an Ixora Bush. I've found that the flowers have medicinal uses... maybe Ed used these flowers to help treat his condition? Apparently the flowers were also used as part of an offering in Indian temples (or something along those lines). I couldn't really find anything else that sticks out about them.

Regards

Ryan, you are on fire. Yes Ark Two as it is the second Ark for mankind, the message is the Ark, the holy grail, left for us by Ed. Prophecy in stone.

Hi sengA,

I finally understand your signature in this post! "Peace 6891" is "Peace 1986".
What happened in 1986?

Regards,
Omar

I turned 21 and 6891 was the last four digits of my phone number growing up. Just a coincidence that it was the International year of peace I guess, I hadn't realized that. What Ryan had mentioned is what I was eluding too, I was suprised he found Bonnie and 6891 peace. I am not the author of that page nor related to Bonnie and or her husband. There is a map of Pennsylvania that I found very interesting, it was one of the first pages that led me on this trail. You see, Ed had traveled on the SS Pennsylvania to America, he was also 25 years of age at the time he stepped foot on American soil. It was just more data that proved that it was a tale that was a veil. And part of this tale is Ed was 26 and Agnes 16 = 42

Re: Ed Leedskalnins Communication Pattern and Agnes Scuffs

by [senga](#) » Sat Jan 24, 2009 12:51 pm

Excellent observation, I wish I could write like that to describe Ed as you did. I will just say I concur on your analysis of Ed's behavior. As far as "Scuffs" goes..... Scuff actually means "Sandles" in which one scuffs thier feet on the ground as a pair of sandles or flip flops may from lack of a band wrapping around your ankle. Also a reference to scuffing your feet, or dragging your feet as in slow to come forth, or procrastination, Scuffs are basically flip flops, and the part that goes between your big toe and second toe is referred to as the "L" or "12" or what some would say is a reference to a square, lamda or what

some say is the number of man, "12". The symbol "L" on treasure maps of old is a symbol for water. Ed has a stone cut like an L that has a rectangular block next to it I believe. Its not far from the missing stone, or stone that was cut off and has a small fence around it today.

[Re: Ed Leedskalnins Communication Pattern and Agnes Scuffs](#)

by [senga](#) » Sat Jan 24, 2009 8:52 pm

Aurelius, thank you for that translation. It's apparent to me that to push away or repel does seem to fit into the puzzle nicely for me.

1. Scuffs are in fact a nick name for sandals or flips flops in particular.
2. Scuffs are also a reference to scuffing, doing damage, to hurt or scratch something, to mare or make imperfect not purposely or on purpose etc.
3. The implication of pushing away, as the tale goes; Agnes pushed Ed away or repelled his advances. Agnes Scuffs = Agnes rejected Ed, jilted at the altar and his heart was scuffed.
4. To scuff your feet. The lazy walker. The dragging of one's feet as too not want to face fear or reality
5. Possibility of using repel to generate force, magnetism, which is possible I believe, but there is many other arrangements to utilize not only repel but attract also.

Perendev-power.com has had some videos out for some time claiming a repel motor with angle insulated magnets to keep them from interfering with each other. I personally don't know if the arrangement works as Mike Brady demonstrates in his videos. They do not do a complete walk around during acceleration of the device. From what I understand today, Mike Brady is building power units based on Ed's design, not exact design, but same principles of using electric motor, capacitors etc. I haven't been back to that story in some time but that's the last I heard of what Mike Brady and Perendev-power.com was up to.

by [senga](#) » Mon Jan 26, 2009 7:58 pm

I penned this poem last Nov. I was having a moment you could say. Thought I would share it with you as I typed it in to my computer today from my notes.

Oh my sweet sixteen, how I miss thee
Please come back to me, use the tree
I hope and pray, my sweet sixteen
That all will come back to me
My heart aches for my sweet sixteen
I cry night and day, my tears are for you
Wash yourself my sweet sixteen
For these tears are for you my sweet sixteen
So that you may come back to me, my sweet sixteen
A honey moon is planned out, the wedding is set, wash your garment, and meet me at the
stone, my sweet sixteen.

Written 111708 RJB
sengA

The following I wrote this morning:

You have haven't heard me say
To measure and to pray

So I will tell you now bout penance
Meditate pray think common sense

What you seek, why I am here
Obscure forums for seekers my dear

I am not all over the place
I am here to show you my face

Its no game or childish tricks
Its just time for me to get my licks

Some know my bee day, some don't
So look at the date else understand you won't

Wind and water 7 years after
Birthdays and Agnes what a disaster

Mayan peninsula Agnes revealed

Hurricane is blowing, Holy Grail revealed

Follow the path what do you see
Trail of storm, mirror thee

It is the vessel that holds the knowledge
Rock Gate draw line to Ed's college

Split down the middle to cups revealed
One in the same metaphors is concealed

Look in old paintings Mother Mary and such
Child outreaching taking vessel, thank you much

It's over and over it's all over the place
This vessel of water, for the human race

Last supper paintings many with no holy cup
What were they saying about the last sup?

Last supper paintings leave some clues
Some knew the grail and left it for you

Images backwards then overlay
Baby, heart and crowns it does portray

Hand at her throat, who is she he
Mary Magdelene? Who is thee?

The marriage complete ring twice for 306
Add one for perfect, 307 pick up stixs

Sweet sixteen plus earth 21 at the door
Perfect numbers is at the core

33 near 6891 the 34 degree
Bees buzzing round my head, truth for thee

It's a big step yes indeed
Free your soul I do decree

I always stepped back and used my logic mind
I had the time to research and myself find

I'm not a drunk, but I like a beer
Bald Grasshoppers and honey

I consume fear

I will continue to write this way
Keep you seeking for the new day

To reveal mythos, the truth of the myth
It's the best plan I could come up with

Thumb and finger a hand erect
Why is Ed's moon not so perfect

It was about this big as fish stories say
A message to measure I give you today

Reading the hand 1,2,3, and 4
6 one and seven, ring twice at the door

East coast, Canada, California Texas too
My path to Florida, my mik for you

Highway 21 Ye Old Spanish Trail
El Camino for royalty, all hail!

Moon and paths Ed made his way
Another way I came to say
Measure me for the new day

Built in Florida a message in stone
A person place or thing a musical tone?

Pointing to the north Telescopes do see
Same building arrangement Giza it be

1940 date of the Polaris scope
12 man 13 soul, messengers give hope

Why did Ed build the same as thee?
Round 2 if you get my gift from the tree

If I don't tell I will have no clout
If I don't tell you the stones will shout

Born of a Virgin, many old stories of old
Tell of Messiah and messages bold

Egyptian religion tells a tale

Same as Mithra, it's the same veil

They do repeat, Mithra and others
Born, Crucified, 3 days for my brothers

Why are they the same story over, why oh why
Different times and places, understand you try

There is a repeating theme here it's all the same
Astrological references time's messengers came

Took the red pill 2 years ago
Down the rabbit hole, I must go

Some of you have taken it I dare confess
Soon you will see me in my white dress

Peace

Lui.D wrote: It seems that one may not know all there is to know intellectually, but they can make up for anything by being pure of heart. That's how Ed strikes me anyway.

Well said.

Yes. I concur...

This is what Mother told me one time...

I seemed to get a direct message from God where She said to me "I am your Mother Creator, the Mother of Your Soul. You always seem to seek knowledge of me, always seem to seek 'proof', and as you grow in knowledge and grow in Wisdom forever seek to know my Inner Workings and to find the proof of my Existence. But know that you should always seek-out my Love first, and that, by

seeking my Love, receiving my Love, and in return you loving Me, you realize that you are of Me and I am of you and that, through Love, everything that is of My Creation is open to you and, by default, you will know everything. Every answer you seek will be open to you because you will have become One with Me. By becoming One, you will be My Inner Workings and know the reality of My existence from the mundane to the Exalted. You will know all things because you will Be all things."

That's the love you're talking about.

~KennyEx

Beautifully said, I agree and I have another take on it also. More to do with the tale that Ed left us. I know its hard for some to understand this love. I guess the way I looked at it is put yourself in God's shoes so to say or Ed's shoes or really your own shoes, go back to the feelings that you had when you lost your first love. I mean when you truly fell in love, then was rejected at some point or time. I don't how many in here have ever experienced that, but most have gone through that experience of losing love. It can be a very devastating feeling that can last for years depending how deep you went. I like to read the words of the "First Rocker" Billy Idol and sweet sixteen song. The song really does say everything I am telling you about the lost love experience and what God may be going through. I have a difficult time reading the words without coming to tears when I think of it in this context. Ed was saying the same deep message by building his castle for his undying love for Agnes. A very deep love he never gave up on. It would painful to hold on for so long. But as the song suggest.....get over you, and God will get over you too in time, so beware.

Peace

These are all pics of Hurricane Agnes, it started in and around my 7th birthday. I have an extra clear view of that day in my mind, mostly because of the events that took place on my 7th birthday. Everyone remembers their birthday parties and such, but it's rather hard to remember most of your birthdays and what you did. My seventh birthday sticks in my memory like it was yesterday. The reason being I had just broken my left arm and it was in a plaster cast. We went to my Grandmothers house to celebrate my bee day and go swimming, which had me bummed out as I could not go swimming with a broken arm in

a plaster cast. When we (mom, dad, brothers, sister) had arrived at my Grandparents house, we were all excited, me mostly as it was my birthday and I knew it was my special day or time to feel special as I had siblings, so it was my turn or my day. As the day went on I struggled with not being able to swim and have fun like my brothers and sister were. We looked forward to that pool many times as we were forced to pick strawberries or raspberries before we could swim. This was typically the rule most of the time when we went to my grandparent's house.

I begged my mother to let me go in, "I will hold my arm above the water". "No way", she said. Finally, as I persisted, my father put a plastic bag around my arm, taped it snug then said go swimming and keep your arm out of the water. I remember the excitement to this day as I had gotten my way and was now going swimming. I remember getting in the pool with a big smile on my face. It was a round above ground pool, very small 15 ft diameter or so and 4 ft deep, but looked huge to me at the time. I and my siblings started making a whirl pool by going round and round and we were laughing and having fun. Needless to say I got my arm and cast wet! I paid the price the next few days has my arm itched terribly, it really drove me nuts, so itchy I cried over it. Anyways, the reason I mostly remember this day is the seagulls. As we were in the back yard a flock of seagulls flew over and shit on us! My Grandma got crapped on, head, face and shirt. Most of us lucked out, however there was seagull crap all around us as if they were a bombing mission or something. We busted out laughing so hard! My Grandmother was a farmer, caregiver, so she didn't mind so much and was laughing too. It was really the funniest things and it really etched a permanent memory in my mind of that day. I can't say I remember most my other birthdays as well. Not even the last!

Re: Anagram of A BOOK IN EVERY HOME

by [senga](#) » Mon Jun 08, 2009 2:10 pm

I wrote this 37 days before April 7 This is the date Ed stepped foot into America in 1912 to accomplish his mission. April 7th has passed 61 days ago. Its been 9 and 7 years. I was kind of shocked to realize April 7th was my 16,000 day alive exactly 97 years later.

I do think Ed was implementing old techniques to move the stones using center of gravity, levers, wedges etc. But I also think he had discovered anti gravity techniques,

how much he used them or when he used them we will never know, but it is apparent to me that he had in fact discovered how to trick the stones into an identity crisis so to say by employing magnetic fields and frequencies of an AM nature.

Sorry I been out for a while
I came back too give you a smile

Hope you thought and pondered a while
Been sharpening my sword with my file

If you want to know how move big blocks
Frequency blasters magnetic field rocks

Take two bottles wrap them in steel wire
Guts of a blow horn tweeter makes fire

Ed had no problem pounding nails where need be
One on each end to two opposing bottles you see

Bucket of water to help along
To get the rock to sing its song

To the potentiometer the power must go
Turn the dial magnetic field grows

I hear the pitch its going along you see
2 to make one cool effect it be

Tricking rocks into identity crisis
Matter to waves gravity's vices

Hiesinburg principle turned to snakes
Gravity has no effect, much of Christ's sake

Matter and energy they become one?
Pretty cool when you see it done

Its not hard to do if you know how
Missing D on the Admisson AM now

Ed's Crystal sets, AM you bet
What AM frequency do you set?

I have already given the number to thee
So be careful using the knowledge tree

Did Ed's Gate had to be in this location?
No, it works anywhere, magnetic levitation

However it helps to lift the biggest stones
Star, planet, positions, powerful spiral cones

Perfect numbers swirling this head of mine
 $8128 - (27 \times 37) = 7129$

Triple series same numbers bee
37 times 3's 6's and 9's you see
triple number series I left for thee

Integer 37 solves many Ed's riddles
Some know that, now play your fiddles

We all know three 7's make 21
Three 7's is special, lets have some fun

Seven times seven one more time too
My three four three I had left you

21 times 37 you know whats true
777 I had left it for you.

Viscus Piscus and my 343
Draw those dots in the centers you see

Three on top, 4 in the middle
3 on the bottom to help you solve this riddle

Start connecting the dots and you shall find
Two hexagonal, perfect number 6 unwinds

Take a step back and look close
My two 21 dice ring for the most

Scandium is some special stuff
Breath of life or make 911 planes tuff

RB is my initials 37 my place
Bose Enstien Condensate beats gravity race

On my draft card it was signed
Same date as proven, that was kind

Flip it around my birthday I see
6 one and 7 more of Ed's numbers, yes indeed

There are other ways I'll just say that
Electrical charges can make magnets fat

1000 ways to harness the field
1000 ways anti gravity revealed

There isn't much time, you got some years
37 days from now 16K days old my dears

Prophecy revealed there's no looking back
Unless you choose to suffer lives times stack

So read it and weep for I have been
Never would have guessed gate to heaven
Peace and love

I wrote this 6 or 7 days ago, I got others but I'm too farken lazy and procrastination is a dear friend of mine. I guess I'm going by my gut feeling. I know many have this on thier minds, I have pondered and figured too long, I was writing a book, then rewriting, then deleting. Since all books are wrong, I was wrong too. I have come to a point where all I want to do is forget I ran into this thing and live stupid or ignorant, however its just not my nature though.

Happy happy, happy 153
16 backwards it shall be
Merry Christmas for you and me
16 days till the 17th

My birthday is coming up
Sorry I put a lid on the cup

43 I will miss you
44 the 17th it's so true
At 168, sometimes 169
Hello I miss you, I am fine

I just had my marriage anniversary
Me and my wife a real curiosity

May the 30th 151st day
Our 17th this very May

Our 16th was great my wife she loves me
But all those numbers was driving her crazy

Where is my calculator I do demand
Stick it up your ass she would command!

She's a busy woman, I got time on my hands
Soon I won't as they come from across the lands

I see you been busy, speculating too
Sorry to leave you and make you feel blue

I have moved from my old local (30.04)
To complete my sword and the holy grail

153 add it all up
1998 understand the cup

2000 years had gone by me
In 1998 I was thirty three

Divide by 2 and what two sets
999 and 999 tesla I met

Divide by 37 27027 it shall be
Minus my address 24023

3004, 304, 34 it's adding the same
Her death in 304 was her claim to fame

3 was an obsession of mine
Wore it on my shirt all of the time

As I got older I started to like 4
It seemed nice to me and opened doors

Cypress is spring, spring is green
Oaks and bluewaters in my dream

Ed's Immigration papers that's real nice
Everyone knows 37, solves and pays the price

My 3 sevens how clever of thee
Some of my favority numbers 3, 4 and 3

I would be surprised to find that docs real
If it is, miracle of numbers is revealed

It looks like his signiture, I know that
Pretty freaky numbers I'm up to bat

Could Ed command the numbers on that paper
I highly doubt he could, looks like another capper

Someone may have put his numbers to make a fool
They don't want you to know what is really true

Chaos to fractal order your creation is revealed
Light and darkness combined and concealed

There is more there than meets the eye
Matching my numbers it does fly

Oh my dearest seekers do not give up yet
I got some gifts for you, good stuff you bet

I hope you pondered for a few months blue
Putting you in my state so you can know whats true

Clocks been haunting you all this time
Numbers spinning your head as you dine

Have you measured your fish today
Subtract the fraction 112 I say

How many Acronyms for TB?
Look it up the same as thee

On the net it can be found
Older dictionaries paper that's bound

Circling the square where did Ed put thee
His biggest block plain to see

Representing Gizeh and the water

Break the cycle and dying as fodder

Why everyone misses it I don't know
Pi to the seventh place you should know

355 to 113
Is a fraction circling thee

617 is the 113th prime
Another coincidence another dime.

It's been around for along time
Subtract the fraction and you will find

242 divide by 2 rings
121 ring twice ding ding

Numbers in circles they come back
Round and round until you crack

Give up your ego fall to the ground
Physical to spiritual you can bound

Perfecting of your soul it doth mean
Pi the 9 place smiles and makes me gleam

Understanding does kill fear
Everything I now hold very dear

Money was it, it was for me
Now its not, so I give to thee

Circle your square and join the two
Transfiguration was edam for you

And it goes on as you shall see
Have you sphered your dice lately?

Peace and Love

Agnes

Just a quick note and a pic for you. As far as the anti gravity goes I did find some curious things in my notes from my experiments. I didn't find anti gravity so to say, but what I did find is that anytime something vibrates it's easier to move. It also appears to weigh less, but not really. I'm sure you have all seen a cell phone vibrate across the counter when it rings and is set to vibrate. When it flashed in my mind a few years ago, I had discovered that it was easier to lift things when they vibrate. For instance placing your phone on a scale, calling it and seeing it vibrate you will notice the scale move up and down. So I got this idea in my head that somehow Ed was able to "catch the gap" in the vibration while pulling the stones upwards with chains. I did the experiments on a small scale and it does in fact take less effort to move something upwards while it is vibrating. It takes energy to vibrate things sure.. so it really is just a matter of knowing how to use energy in different forms to move something. Tricks of the trade I'm sure.

Edit update: Just for the record, going over my notes more closely I noted the scale didn't appear to move. I was using a triple beam and had also noted that the scale was vibrating and the phone was moving on the scale. I had hypothesized that if the scale was rock solid that perhaps it would show a reading of less weight. For every action there is an opposite and equal reaction etc. so that didn't work. I had also suggested that you would need one vibration to offset the the other. I guess what I was getting at was 2 sets of vibrations to perhaps to achieve catching the gap between the vibrating chain and vibrating stone. Since the chain would vibrate with the stone, catching the gap or making the stone easier to lift would be difficult. However if the chains were vibrating at a different rate or opposite rate a gap could be created that perhaps the chains could catch on thier way up where by making the stones appear lighter or seem lighter when lifting. Anyways I didn't prove anything and was making assumptions stating for sure mass was easier to lift when vibrating. Easier to move laterally, but upwards, I just don't know.

I will say those two bottles had me perplexed for months and it sent my imagination running wild.

Many things ran threw my head, was it 121193 hrz or a combination of 121hz and 193hz Was it tuning the electricity into the wirewrapped bottles then blasting a tone out the blow horn guts wrapped in papper sitting in the bottle? Anyways that was all before I ran into the deeper meaning of Ed's messege. Free energy and anti gravity are good and all, it certianly can cause a paradymn shift in one's thinking, but it goes beyond all that.

Peace

Ed's biggest block clearly shows the rounded edge of the circle on all four corners of this stone. The circle overlaps the square or square stone as the visualization of the ratio.

Peace

Oh and just one more tid bit about the "circle the square" It is I believe the ultimate secret of the freemasons and is displayed so blatantly as their main logo, the compass and the square. Out in the open is classic freemason style. The so called big hidden secret is really reincarnation and of course as Jeremy was able to point out in those pics of the freemason temples, magnetism and or free energy which has everything to do with water to the magnetic soul, gravity and the field we live in and the geometry of life, energy and matter. References to reincarnation were most likely removed by the early Christian church as the agnostics basically lost the battle and much of that belief system was lost. From what I can tell the freemasons were able to hide some of this information in the bible. Some say the bible is a satanic bible and or instrument of deception because of the meddling of freemasons in the 1611 King James Version. This is possible but many of the freemasons at that time were in fact Christ focused or centered. Propaganda isn't propaganda if the truth is not presented along with it. And we all know there is truth in the bible as with any religious text.

A classic example of Christ being the primary focus of freemason belief systems is the story of one Joseph Smith, founder of the Mormon religion. I recall that he was made a 33 degree mason in one day. Very remarkable considering the process and the secrecy, process may have not been much then but the secrecy was prevalent at that time in the 1830-40's. Why they wanted him is anybody's guess, many Mormons were freemasons so it may have just been a natural fit, but what I remember from the story that he seemed to know most if not all of what the freemason secrets were and had some of his own. Many say J. S. took the freemason rituals and incorporated them in the Mormon temple. However I don't think freemason's were sealing marriages for all eternity and doing baptisms of the dead. But the overall theme here is as obvious as the Mormon belief of achieving God hood or God hood status. Seems to be the overall theme of the freemason's as well.

You can certainly understand their secrecy considering the position of the Christian churches and teachings, power structure and rule of law etc. Teaching or displaying these thoughts really was a crime to the church and they had the power to do you in so to say. I think a lot of this information came from the east as the Templar's explored and came back to Europe with the data only to have the church call it blasphemy. I would hypothesize the knowledge was buried underground since and carries to this day through the likes of the freemasons and other various off shoot religions. Honing your stone to a smooth surface, i.e. living righteous, perfecting your soul, life would be easier in the next life if you lived a good righteous life. Somewhere down the line various groups were most likely infiltrated by those whose motivation was not righteous. In any organization that man creates, there is always a time when evil creeps in. As generations pass and power changes hands all kinds of things can happen. I don't want to beat up on the freemasons, it's a group I don't much care for today.

Take care, will be back in a few days.

Peace

Agnes

*ResidentEx wrote:*I wonder if, in a manner of speaking, the stones could be viewed as the 'bell' and you must 'ring'/wrap them twice/two different directions?

Interesting...

But you say you think it's more than that? I guess everything is vibration, right? Do these particular vibrations transcend into something more?

Thanks, Senga!

~KennyEx

Sure, stones as bells, I can dig it. Vibration is essentially two different directions. Your adding energy to the stones to make them move.

Yes, everything vibrates or what science calls magnetic resonance spin.

Not sure what you mean by transcending into something more, other than getting results.

Multi faceted those results may be here in this physical plane, they could just be symbolic of the physical to the spiritual or gateway to God or heaven.

I'm curious as to the last part of your message. I've been looking all over Ed's materials. I don't see a Capacitor. I don't see a generator capable of producing frequencies above 20 Hz (hand cranking method only). I don't see a magnetic amplifier or mixer of any kind to produce a modulated sound in the range of the human voice (may audio through a horn?) where's the microphone? So, how did Ed produce the audio modulation to create the vibration in the first place?

It is possible using a capacitor and an inductor (cut to the right length with the right AWG) using the hand generator a source of power. I suspect that Ed stored the magnetic energy in the STONEs themselves. I suspect that the configuration of the stones could have been able to produce amplification by themselves... but where from ? The SUN table? Does the generator need to placed into the correct position too?

All materials are magnetic. Ed said that. He also stated that magnetic energy could be stored anywhere in anything. Why not the stones themselves?

Anyone got ideas on that line of thinking?

Ed was a junk picker and I'm sure he had lots of parts of radio's and anything else he could get his hands on. Many of the things Ed had laying around are simply gone and I'm sure he had a quantity of capacitors laying around. What you see at Rock Gate is what is

left.

The only capacitor I referred too was the wood block with two terminals near Ed's magnet motor. It could have been just that, just a terminal block, I speculated it was a large capacitor insulated with wood as into shield it. Unfortunately when I was at Rock Gate 3/4/2007 several years ago, I didn't take a closer look at the wood block and generator/alternator/electric motor. It really looked like a pulse motor set up too me or one of the other various arrangements people are presently accomplishing at overunity.com or seen on you tube. I think Ed merely cranked the handle to get it going, then walked away when it self accelerated as perpetual magnet motors should demonstrate. I don't think Ed's magnet motor had to be in that specific location to make it work. Magnets work everywhere weaker in some places and stronger depending where on the planet you are, not by much though, but what it demonstrates to me is the relationship between gravity and magnetism as we know of it as two different birds, or are told that, but we all know better

I don't think Ed was storing magnets in the stones to move them; stone makes a rather lousy repository for magnetism as those properties are extremely low in most rock. Even though at the atomic level yes it may be an arrangement of magnets, or energy, but its arrangement will not necessarily be advantageous for storing magnetism like a battery or yield you magnetism or electrical energy on a useful level so to say. Basically all mass is magnetic mass, but it don't mean all will be good repositories to hold extra magnetism, like a battery for later use. I honestly believe Ed may have tapped into manipulating mass to act more like a wave to achieve the antigravity effect or what I call giving mass an identity crisis through manipulation of that specific mass by various means.

However your statement of storing magnets in the stones does bring me back to a man called John Hutchinson who did all those wild electrical experiments. He does a video out where he does take common rocks and crushes them up, cooks them with a few ingredients and produces batteries that run supposedly forever. Pretty amazing to see voltage reading from some crushed cooked rocks. One has to ask themselves, "where is the voltage coming from?" I believe it's the arrangement of mass he accomplished to harness the field.

To sum it up, its possible what you say, I won't discount it and you very well may be onto something.

I have found no indication of those numbers being requested by Ed. I do NOT believe that is true.

Hello all, just passing threw. Thought I would throw my 2 rings into the mix.

Ed's numbers, hmm..... It would make some sense to me that Ed may have requested the numbers; he had a way with people and seemed to know the right people to talk too. Putting yourself in Ed's shoes and studying the man closely, Ed was, no doubts about it, a very clever individual. I think it was an attempt by Ed to absolutely ensure those numbers would exist into the future. If he had the opportunity to do it, I know he would have, as paper records and or the fact that governments tend to keep permanent records for a very long time, especially of those who immigrate. This fact alone may have been the motivation, knowing that his own documented numbers may outlast Rock Gate itself. I bet he worried Rock Gate could be gone as development changes landscapes over time. Maybe he didn't think his numbers would survive physically on stone. Even Ed knew the great civilizations that had existed had very little left over other than their constructions, if they still stand, most in piles of rubble or simply buried with new towns built over them. Why he didn't carve the numbers huge on a stone or make a permanent as possible monument to the numbers is obvious. Simply wasn't time for mankind. With WW2 raging and paranoia of the US Gov onwards and afterwards, being in Ed's position, he had to be careful. One pissed off customer could ruin his life. He let them marvel at his work in stone, but wasn't going to create a paradigm shift in people's minds at that time with mathematics. He did it with his garden of stone, made people wonder, but they didn't know much more after visitings Ed's place.

Ed was not going to create controversy with religion etc. Ed valued his privacy and way

of life, he wasn't going to rock the boat and create controversy that would subject him to some form of punishment, like being told to leave the country, or other possible threats from fundamentalists Christians or Gov. Agents. Back then anyone making a claim of how things are would have come under a great deal of scrutiny, grief, people showing up to argue with him to Gov. Agents harassing him. It may have caused such a big deal it became a national security risk. For when you change the hearts and minds of men and wield a great deal of influence of the thoughts and minds of others, it doesn't jive well with any Gov. Governments like control, especially over your thoughts; religion binds people's minds and closes doors. Ed's numbers and the corresponding mathematical formulas are very liberating as is free energy. You see my seekers, those in power do not want your mind liberated, and they want you to have faith in God, not surely know of God. They don't want you to have free energy, they want you dependant as do the corporations.

The numbers are very discreet and out in the open, you really got to look for them first time viewing in person. If you didn't know they are on the door frame, you wouldn't even notice them and walk right on by the secret to the universe....he he ha ha. I think Ed may have got a kick out of that also. I think the second set was to further protect the numbers in case something happened to the first set. It may be Ed's number set, off the stairs, was the first set, very obscure. Maybe he felt safe putting them on the doorway after he had citizenship which would make some sense. Plus it gave an extra layer of protection, as Ed could simply say, those are my immigration numbers what are you talking about. I'm sure Ed explained those numbers to a few trusted friends, and I believe some of those friends helped to perpetuate the "tale". And as we all know, "tale's can be vial's with truth and lies mixed together. Often the lies are clues that lead to deciphering their truths. Ed's tall tale is very clever and serves a much higher purpose that I will be disclosing in due time Its pretty well known in the story that Ed had a plak in his room stating the secret to the universe. No proof, but certainly part of the tale that could be true. In any case we look at Ed's numbers closely. I am sure Ed told those who would listen about those numbers, but in doing so he knew it was a risk, and Ed certainly seems to have the profile of a man who knew the risks and took steps to minimize them.

Ed new everything deteriorates and changes, Rock Gate will not be there forever. To me it really don't matter how they came about on the document. If it were just a coincidence, like I said earlier it would be the miracle of miracles. The odds are overwhelming, millions to one in fact. Which leads me to believe that he did in fact have some pull with someone. Ed certainly had a group of local admirers that would do anything for him. I would assume some of them worked with local government as in the case of Mr. Mosher who was the local land man.

I did notice when looking at the numbers on the door frame, they seemed to be scribed in then hardened with something like you do when tempering steel. Which would also make some sense if you wanted them to last. I suspect the numbers were hardened.

Just follow this link at greatdreams on Ed's numbers.

<http://greatdreams.com/grace/99/99BBBBelectrons.html> A lot of this stuff did come out

in 1998. 144 half light etc. I think it will explain a lot if you have never read this material. Light, Darkness equations pay attention to the numbers used. I also like the part about 3168 and 34560.

Anyways after reading forwards and back which I highly recommend, along with other pages at the sight, playing with the calculator, this information is a good base to understanding the mathematics of the universe. Mass certainly follows rules and the resulting ratios and distances found in all bodies in space are absolutely remarkable. Chaotic systems don't stay chaotic and quickly organize themselves in the phi spirals that we see in the mirco to galaxies. Ed's numbers are really an all encompassing key code to the arrangement of energy and matter, interactions and order from the mirco to the macro. Order just doesn't come out of chaos on its own. There are rules in place, been from the beginning. In other words, it's a mathematical certainty the big bang was pre programmed by higher intelligence to react and organize in this fashion. Welcome to the fractal universe, where all can seen with just a slice. Welcome to the machine, indeed.

7129 6105195

The integer 37 solves this mysterious ratio...cosine in radians

$$((7129 / 6105195 / -37) - 3) / 10 = \cos (6105195 / 7129) -0.30000315593 = -0.300003156397$$

The integer 37 also cracks the ratio to the Feigenbaum constant, t ruler of the mandelbrot fractal, chaos to order phase transitions...F=4.669201609 = Feigenbaum constant...tangent in radians

$$(\tan^{-1} (6105195 / 7129 / 37)) + \text{Pi} = 4.6692....$$

The Leedskalnin ratio also clicks to the Cheops constructs through the amplitude for an electron to emit or absorb a photon , the fine-structure constant...a(em) = 137.03599976...1998 NIST

$$(6105195 / 7129 / 37) ^ - (ht / 2 / bl) = \cos 137.0359815$$

when ht = height of Cheops pyramid = 486.256 ft

bl = base leg Cheops pyramid = 763.81 ft

reference Churchill/Massey 1910 expedition to Egypt

1/137.0359815 is 99.9999867% of 1998 NIST value

Interesting to note that when Leedskalnin died (1951) the value of the fine-structure was thought to bea(em) = 1/137.035978....

Another interesting Cheops constructs form is as follows:

$6105195 / 7129 / (37^{17}) * (10^{25}) = 10^{(2*ht/bl)}$

if $ht = 486.2573394...bl = 763.81$

Hello, thought I give you some of my dress, it's a little tricky I must confess. If you choose to ignore and scoff, well, you can always turn the channel as they say. So before you read below let me say a few words of from the original Planet of the Apes. "Don't go there, you may not like what you find" I have been there and I didn't like what I found, it scared the hell out of me...hehe....I guess I have now changed that message to, Do go there, do understand, like it or lump it. If anything understanding does relieve fear and that is what I have come to know a few years ago. I still fear, I am weak, I am a still a wreck, so I must move forward to wash my dress.

3 times a year wind water earth and the fire
4 quadrants of the sun determines your desire

Yes that funny little symbol that weird cross
Not a German swastika, where is was lost

Negative positive is coming at you
The 4 horseman of 3 months make you feel blue

Mutate virus and bacteria strains
Men will be sick penance and pains

As the riders come in you shall witness the destruction
As the clues come together, witness the construction

Oh the sun that fractal cube
Oh it cycles time, its real dude

Reading the fractal your nice little charts
Up and down it goes like rhombus darts

Where do you see the charts left for me?
Course and thickness, I beg look thee

If you know about alligators standing on their head
Time runs from the tail to large waves and you're dead

Ed did the same on his biggest block
Compression marks representing a clock

Carved it out hole in the middle
Sun fractal geometry in this riddle

Mayan new cycle of sun spots
They counted all the fractal dots

Crystal skulls, circle on a plate
Burn the leaf offering can tell your fate

No shadow on a stick in the ground
Rattler skin shed once year round

Loses its teeth every twenty days
To gain a new pair for biting I say

Circle on the plate, skulls used to help date
To reveal the spots, to determine sun state

They have many stories, also in visual art
I see One's fear did them, I said mirroring is your start

They did the same, many stories reveal
The bat the devil the serpent concealed

For if you understood what all these symbols mean
End of time cycles, infertility, deformations not a dream

For they do come all back around
To harvest souls they have fear bound

STAND UP STRAIGHT!
KNOW Your FATE!

If you have studied from many places
This was known before earlier races

It's passed around, especially destruction bound
Brought to knew places, and teach it around

In old paintings from masters and such
Vessels of water, sunray charts to touch

The sun of man with the heart
Beat of time, don't be a fart

Fractal graph the sun rays is a code
My back is fried many beans I hoed

There're all around we use them everyday
Fractals are also charts I will just say

Oh my great light, heartbeat I know
Same as everything else it doeth show

Scales of a snake
Diamonds and Christ's sake
Nets and fishes
Understand for you I wishes

As the charts slither along
Snake crowns his head rises to sing his song

9 the 9 and 9 it be, add a 5 to make this gleams
Secret to time that what his name means

I know you have heard Led skal nine
But have you ever heard of the Lead scale of time?

Well let me tell you so you spiritually may say
7129 six one zero five 19 months and five days

That be 18 x 20 for turning 360 degrees
Or our year as we know it 5 more days it be

6105 and ring it twice
Tixmes Ed's dime that's real nice

They both are the solstice can't you sees
Or maybe you did get stung by my bizzy bees

Didn't I tell you Ed was telling the time?
Scale up the buildings made so fine?

If you knew your nines
If you know your time

Look for scales in old stuff
Fractals to geometry not some fluff

Scales of a snake swimming along to a fish
Both the same things, understanding is what I do so wish

It's all the same scales that wave along
Create the geometry of singing a song

Earth's figure eight fish wavy plate
Five fins and fingers are your fate

On the door and my sundial
The wave of our orbit will give you a smile

They show it in fishes with five fins
They showed how 5 fits right ins

The first was wind, and it will be the last
Understanding the cycle and the past
The first is the fifth and the first is the last
Wind makes fire and big waves that blast
The earth rumbles, into the fire you are cast

Up the pyramids you do climb
Scuffing your feet down the scales of time

Earth has the reflection it's helped make thee
From the sun, magnetic photons did help make me

I know you've see the sun on the door
16 points Earth 21 what number is core
My sweet 16 my phi my son
My sixteen points on the sun

If you understand this little riddle
Then you would understand how to play this fiddle

It's fast and small on universal scales
Huge for mankind, slow burn it entails

If you understand Ed's fractal BBQ
Sun's fractal cube, lest saved a few

If you're observant and a good looker
The you would understand Ed's slow cooker.

Those hot dogs in there will be you

Shelter is the key hole, where it's blue

Then you would understand alive is to repent
Then you would understand Ed's was heaven sent

Better to know now that holy sun fractal cow
Then to scream crazy when all falls like the Dow

Be at peace for you know what's true
No reason to be afraid and feel so blue

I know you will for I have too
Better to get over now than then turn blue

Stay alive and witness destruction to creation
Understand your roll and your mediation.

For so many will be so scared, ignorance to suffer
So take a part, it's a start, to be mankind's buffer.

Understanding is the greatest gift you can give
Hate to tell you but you probably won't live

So cast your nets to the right
Make those around understand your plight.

Accept it and die its ok to carry your gunny sack
Burlap primes remember no fear lest I cast you back

But if you want to be dead or alive literally
You need water for both, I can give spiritually

If you want to progress
You need a white dress

Knowing now and turning blue
Get over the fear before it comes true

You will be the pillars as fear takes flight
Make them understand the process, fear is blight

Remember its all about water and how I made thee
Remember what time really is, your heartbeat is me

So you can write a new book
Ed's penance corner key hole look

So if you don't want to slow roast like hot dogs
Shelter is also a key, and not acting like hogs

Ed's repentance corner faced away from Ed's pit
Shelter and keyhole repentance is it

Repentance is the key lest the pit
Repentance dead or alive you know it

It will be extremely difficult for the average joe
To survive physically and your mind not blow

Some of you will be around a while after
To write a new book about God's process of world wide disaster

I know it sucks seems it's not fair
What would be the point if you did not bare

So I give my burden now it may seem looney
You don't have to turn into some kind of Moonie

Love you neighbors and your friends
Tell them fear kills, it sucks you in

God is great God is good so true
If you only understood how time makes you

That door is Rusty, it's the front gate
Gemini born to explain your fate

Paint on the door it's almost faded, at its end
I made it that way, timed out that way, rust to mend

I timed out oxidation so you would know
Time is short, time to begin this show

Oh my smooth finished has worn away
Revealing my fractal college I say today

Just like Gizeh and its brilliant white coat
Eroded away, fractal revealed, build your boat

For it is naked as you and I
Find your coat and you shall fly

One last clue before I go hone my sword
12 knots and 13 cords

21 and fishes, boats and nets
Listen closely before you make a bad bet

The Great Light is a photon it's what it represents
An alter to the lord and about corner stone penance

So many things Ed had left me
Gifts from a simple messenger
And my water oak tree

Grab my wedding bouquet on Ed's door
My name is Agnes and I will give you more.

Knowledge truth and love

[Re: Anagram of A BOOK IN EVERY HOME](#)

by [senga](#) » Sun Aug 02, 2009 3:32 pm

Here is another, I tend to repeat myself, so bare with me.

Snakes make waves peak and drop below
Ed was a very clever fellow

Didn't I tell you about those snakes
Rattling 10 cents for goodness sakes

The dragon comes with the bat flying out is mouth
Death and waste will be all about.

I guess you never read Ed's horoscope
I guess you never read Ed's horoscope

That be two times if you get my drift
His 2 birthdays show of great rift

The one that consumes children in there beds
The one that drive the adults out of their heads

Fishes and snakes those slippery scales
It's the pattern, the geometry it entails

Scuff your feet up the steps
Rubber people did as they reps

Rattlesnakes scorpins cobras fish too
Scaly fractals make diamonds, not idols, to give clue

Who made them first knew what they were
Who found second guessed and blur

They come to find the truth later, from ignorance to understand ding
It has happened over and over, yes the bell underneath you ring

As time passes by, fingers nails stay cleaner
More time to look, ponder, your mind leaner

We slowly learn again what happen to lands.
As population grows, more time on your hands.

That's all in the fractal too, it's the same chart for most things
That heartbeat, that warmth, the great light my two dings

Reading the fractal I see this large up bent
The heart shines bright, a crowning event

Wind was first and will be the last
Stand up for what you now know of the past

Wind water fire earth four destructions
Wind was the first now the last in its constructions

The feathered serpent will fly you away
Over the waters and around judgement day

Another new years day rings for you
Last is the first, you know its true

For fractals lead to geometric shapes
Oh Lord not another planet of the apes

Dr. Zaira I should have listened to you
Your right, I found, it made me blue

Down below my physical, mental and spirit crash
Down below I realized its not about the cash

Drop below can mean many things
They do in fact, all are ding dings

So drop below into your shelter for it is the key hole
Son's crowning event, strontium blast DNA and earths pole

Drop below there or here is repentance
Drop below can be used in many sentence

Cancer and deformities infertility rise
A slow cooker of death I do surmise

I'm over the blues when it comes to that stuff
But I'm not over the blues, men still get tuff

I understand the cycle before me
I understand the process that made it all be
I understand how God really loves free
I understand how God really does love thee

I don't think you have to change your life
Just don't be scared of the coming strife

Do you really need every detail to know
Be a big picture thinker, mirror is a show

You will find them if you look
But I won't tell you, I'm not selling a book

Perhaps you all are now as I see S's in your eyes
Your books are not for selling, someday you'll understand why

Love your fellow man and love God is true
Not silly superstitions that will be coming at you

Embrace it and warn your fellow man
Remove the fear your part of God's plan

If you plan to survive, its hell in high water
Better start now, move away, lest you be fodder

Time is short a couple of large events
Will have you locked down before starts sent

They could have told you but they choose not too
They play this global weather politics only to confuse you

You won't know what is up or down
They spin it keep your head going round and round

I often wondered how the sun may do this
Maybe Dorvak is right a .10 planet orbits
Drops below comes back to crown the sun
The destroyer, also known as the second coming of the son

Do you think governments would ever tell you the truth?
They will after lockdown, that's very uncouth.

I will just say I don't know what casuses the sun to do this
I know its real, It seems logical, push pull, to give it a twist

I will just say like in the movies the best way I can
Top half the planet bad bad bad, Go south, drop below, young man!

Peace and Love

[Re: Anagram of A BOOK IN EVERY HOME](#)

by [senga](#) » Sun Aug 02, 2009 3:58 pm

I wrote this some time ago as a response to Mr. Solar and him assuming.

PS Solar, Ed didn't have a social security number, I didn't get mine until I was 16. In Ed's day Social security was for those slipping through the cracks financially. It was not required that you had to have a social security number. Ed had money, he was not broke, he earned it, saved it to build rock gate as it was his mission.

Anyways I wasn't going to revamp this poem so its coming at you like if flow out my mouth, its was the way I was feeling, its not meant to insult you Solar, but is rather a message to all.

Edit.. well I had too just now, my spelling sucks.. lol

Oh my dearest Solar what has happened to thee
I wish you would you your own words not these

I give you the key of David so you could see
I give you the key of David so you know how it be

Much of thee objective are contemporary now
Giza and measurements, the fractal Dow

Why don't you keep up on what is out there
Why do you plagiarized instead of compare?

I guess I was a little vague
I suppose I deserve that, listen I beg

Everything Ed did was with purposeful intent
Numbers on documents to great extent

It's not the first time Ed had done this
The odds are against you sorry you miss

If you don't like puzzles or to do simple math
Then I'm sorry pale, you're off the path

If you're going to be a skeptic to find what's true
Then wear your own clothes and talk like a real dude.

Please take no offense, as I talk strangely too
Spring oaks to Greenland I try to lead you

Its not you're own words and you know that
Think on your own don't wear another's man's hat!

If you know Ed you would surely see
Then I wouldn't have to whip you, branch from the tree.

Again please take no offense
I understand my head is dense.

The only number that Ed ever talked (16)
The only number left on the door past by you walked

Sweet 16 do you think we assume?
Well known in the story, you must consume

16 points on Ed's sun on the door
Earth 21 is 37 threw the sun one more (37)

Turn the sun 3d sideways it points top and bottom I do say
N turns 360 and South pole also, 37 two more ways

Does thou not know you walked past the answer?
Does thou not know that Ed did not die of cancer?

Free energy and more EMF's? You really don't see
No power lines and much less EMF's it be

How it works you doubt anyone would know
So why bother with above so below?

It is quite obvious if you wear your own clothes
Or are you misleading you'll burn on Ed's stove

Those are the few and the obvious math
Probabilities go up as you take that path

I see you like my three sevens
Have you not rung twice, seen bread unleven?

Have I not told you to mirror the numbers?
I see others have and have awaken their slumbers

At least One's fear and Greg get the idea
What do you mirror, not furniture from Ikea

The Bat, the rat the devil too
Feathered serpent is coming for you

Ed was not evil as the mirror can make you mistake
Ed was telling you this is real and it's not fake

I'm glad to see their excitement build
Why not you? Their excitement you killed.

So ring your triple sevens to 1554
Reverse the number and open the door

Add them together and you shall see
6105 in your face it surely be

Give that two rings to 1221 0

Times a dime, Ed is my hero

9 base numbers in your head
9 they did not worship it was their bread

Statues of snakes winding around
They didn't worship but were highly renowned

Only the ignorant worship these
They are creation clear as the trees

Did I not tell you 195 norths and south is where it happens?
Did you get the dime, latitude lines above below to cold for snakes nappin?

The 19th month and its five days
Because 18 times 20 is 360 degrees I says

Star of David and planet earth
My belt my waist my beer belly girth

Yes 18 Greg it does fits
Because of the tree and all its tits

For babies to give suck my dear
When they pass quickly, so far so near

My fractal thought process many branches it be
My hair flows down brings it to my head you see

But I'm almost bald grey hairs in my head
I have aged myself fast, I know I will be dead

I wish I could stay to hold your hands in the end
My fate comes sooner, God's will does not bend

It really sucks to know all this
Sometimes I wonder if ignorance is bliss

No its not! for when an untrained swimmer drowns
They are reaching up for something to grab hold of, fear and frowns

Mortality calls, as you chomp at the bit
I'm telling you now you must embrace it

The black hearts slowly looting you out
They know all this it is no doubt

Worshippers of creation and the owls cunt
911 was \$\$ was the biggest stunt

They make a mockery of what you believe
Kept you from repentance your life the same you see
They made money by knocking those pillars
They are male whores, blackmailers and killers
Resting in the nest planning their next quest
Plant you with doubt, your soul not to rest

They feed on you like calf to mother
Sucking on your fear, and sucking their brother

Oh you should have repented by now
They keep you fooled, you won't see the cow

Astroids and Comets coming for you
1000 times on TV desensitizing its true

For when the sorrows start to take place
Extreme guilt wash over your face

I should have done something I should have listened
Woe is me, where is God! Fear is their religion!

Woe is me and my children, nashing your teeth
Turn to animals, humans as beef

Oh woe is me I should have taken note of the shows
It's a setup, Guilt for them to suck on, like their penis hoes

DO NOT fall for this guilt and anger
DO not fall and give in to butt buddie bangers

They blackmail each other, soon they will fight
Making their moves, everyone wants a bite

Oh yee foolish men who try to steer time
Oh yee foolish men, those are the biggest crimes

Straight men mind control sex brotherhood
Most not even gay, would get out if they could

So my fellow soldiers who read these words
Bail now, expose them and show us big turds

So I can flush them down my toilet of water
So I can send them below, no more cannon fodder

For fear is their drug, its makes them laugh
Chaos is their order, blood to take bath

Sucking on it gives them powers
Suck on this bitches, and smell my flowers

Yes my butt hole stinks like everyone's asses
But black hearts are so foul, nasty, noxious gases

Ed left me a heart and flowers to kill the smell
To spray in the air to kill fear and send them to hell

So suck on this you demented male whores
A dry straw for you as you wither to the floors!

You will be dust under my feet,
You will be lust driven out in defeat.

For many will come to know what is true
I strip you away, your naked, we see you

The data and pics from many places
Not just google or wiki races

Did I not tell you to read many books?
Have I not told you all you must looks?

The numbers take you away for a ride
I would like stop, but I know I can't hide

1928
Oh that special date

16 years USA I had built
16 years after, document I quilt

I was 39 in 19 26
Son orbits 360 it's 26
N and S turn at 37
Ed's date and numbers he was from heaven

Turn the handle of my 4133

Photons with Steel Ed harvest thee

That is on the handle, oh sorry you didn't see that
Please be the observer, and put on your own hat

I guess you couldn't have known if you didn't look
I guess it's why I'm here to tell you, not from a book

Number on the handle, raphus and add, now in half by 2 rings
My two 37's which make 74 ding ding

When you find the family of scuffs you shall surely see
Double 37 every where for you and favor for me

There are many more these are off the top of my head
Because I have not written, because I will be dead

I have told you I am not writing no books
Because I learned more money is only for crooks

I learned two years ago it's not for me to write
It's for all of you to do so others can know past plight.

So start to remove the fear and know what's true
Then I will stop feeling so blue

No time for thieves to suck off me, turn data into stash
No time for magnet motors and dreams of big book cash

I have told you time is near
I have told you no longer fear

Trial by fire study rouge waves
Objective to contemporary not hidden in a cave

So I tell you now, it's about the su-on
Tell you now so you know how it is done

Understand the fractal, Always a big dip
Before your ass is fried the sun's holy grip

The snake the dragon crowns its head
When it strikes you'll surely be dead

I love my 9's that coiled snake
The 9's will tell you were going to bake

Then toss around like my toss salad
Like the musical universe, that wonderful ballad

For if you know what is true
Then you know why I so blue

I am human also and will suffer with thee
But you don't have to as bad, if prepared like me

The four horsemen will all bring different effect (the sun)
The four quadrants, 2 neg 2 pos you can't reject (same as Ed's motor)

If you study the sun you can do more than guess the rest
Different thickness in Giza courses read that fractal best
You will see what I mean on your lonely quest

It really comes down to mathematical certainties
Fitting the pieces and counting the anomalies

Outstanding odds that what I say is true
Astronomical odds which force you to conclude

We do now know black plague was solar event
Changing bacteria and life's DNA can get bent

Causing plagues and other things to arise
It will seem like the end of the world I do surmise

Passes threw you no escape for you
Man is over yes its not but is true
New species is born, that why I feel blue
Not many left now its starting over
The meek survive the rich survive and go crazy
Like their not crazy now but many do know
That's why they build super subs and dig holes in the ground.
They don't want panic and keep you deception bound
They need time to loot out the rest
If you think they care about you, weep for souls to rest
No escapes this time clock of despair
It's just the way it has to be I know it don't seem fair

I am so sorry my dear seekers
This is not about surviving physically as I call you peekers
This is about spiritual survival that why say meekers
Then you understand why I say it like wearing sneakers.

Thousand years of breeding till the next war
Then too will they forget what's really at the core

2012 and all the worries bring fears
I got time you say, let's have some more beers

You can learn from me it requires no pay
Then you would understand Ed's birthday

My three sevens make 21 "OO" I say
Alternate numbers and have a bad day

What time is that I don't know milk to cream?
2 years to long like thief in the night I do mean

A couple of events and you'll be lock down
It buys them time to get out of town

They won't tell you till they can't prevent
Don't matter now your locked down event

My water is gone no food on my table
Servo street drones take aim tenth able

It's extermination by those determined to live
It's an abomination those souls I will sive

2 years of repentance before the big day
2 years to short to prepare I now say

You'll be at home your comfort zones
Roast like dogs and scraping human bones

Ed's dates are numbers for you and me
For its about time it's plain to see

1928 is the first number he wrote
From 1912 is 16 from 1944 is 16

From 44 tis 21 till 65
Year of Kenny's birth, that's no jive

1928 plus 37, is also Kenny's birth
Smokin greengrass hoppers, eating honey my girth

Ed sure did like his threes and sevens
Follow along this path to the heavens

Died in 51 two sevens till kenny's year
Understand your sicrinicities then nothing to fear
I know that angle yes it is hear
Giza and fractals I hold dear

Ed was 37 when it was 19 24
Triple eights are knocking at your door

Ed was 34 in 21 Fib numbers all over
Ed harvest them with his 4 leaf clover (Ed's motor)
What has five sides 13 acre base
21 acre sides 34 is the total case.
Ed knew that, I know that, as I am his biggest fan
You would know he knew that as Ed was a landman (surveyor)

I'm sure you been seeing Fib numbers whack you in the face
Spirals in and spiral out of this place
Ed biggest block, to opposing golden rectangle no doubt
112 the first three fibs
Old man born back in baby cribs

Cosmos69 Ive seen square that circle so fair
Yes I know that circle your square

Most observant I must confess
Soon you will see me in my white dress

12 mankind 13 soul
12 knots and 13 lengths

5 has order not well known
5 is chaos and not over blown
5 squared I am here
Hide 25 now add 1940 there

5 and 5's is also part of Ed's numbers my dears
555 Christ conscious is at the end of the peer.

Like 111 you'll see it soon as Ed had left
My 3 37's I do like best

Like 112 you'll see it soon as Ed had left

Like 113 you'll know it best

He arrived on in 12 I k now have clout
Add two sevens, 26 the sun's rotation is no doubt

1928 is the 28 for earth as it is for us
Its rotation and woman cycle match I must confess

Moved in 39 eleven years later to dig new holes
Just like the sun's average of flipping its poles

Where is my 22 my V my peace my love
22 years the sun complete full cycle white doves

19 33 this date is on his mind (37X33)
19 34 and Agnes he did long for
Don't want to lose her now,
I'm half way done I'm so proud
I must stay humble, lest they figure me out
Now I just have to move this gate
so they can see their fate
Which will make my statement loud
Its all about timing don't you see
The message in stone I had left for thee

Have you not seen the greatest stone in the lands
Have you not see the greatest room upper hands
Have you not looked into the sun carefully
Have you not seen what I have seen
Penrose equations beaming down on thee

Oh my little photon you are so bright
Where is your brother, the one that takes flight

Oh is he the one passing threw me now
Threw everything this holy cow.

19 24 I he was 37,
27 more and I'll be in heaven (1951) (999)

Ed was 25 when he came to the USA
Why did he made to be known 26 you might say?

Because 25 is number of messianic presence
Because Ed was tricking that evil menence

1940 add plus feet tall 25
Me and Kenny birth year that no jive.

What has five sides and the number 33
Days apart me and Kenny will be

1912 to 1940 is 28 sun eq. rotation days for the earth
So many ways Ed left you to understand my girth

Sun peaked and mankind streaked
Civil rights and the devils freaked

For you time of sorrow is about to begin
I told you 00 where have you been

These are many facts yes no doubt
Ed's numbers and sun give me clout.

For if you take the time and actually dig
Statistically anomalies add to real big.

Odds that is, statistics, probabilities
Overwhelming truth in these realities

Just a few more then I'll go
6105 to rings 12210, times my ten cents

195 is 19 month which is five days
195 x ten cent I live on the bays.

You know those circles with the knotches
Ratchet down is five days, its about sun splotches

I have told you too cold for snakes nappin
I have told you look, numbers your face a slappin.

Have I not told you Mayan Hebrew connections
5126 divide by my sweet sixteen
3168 go and look up what it means

Oh dearest Solar its all about you
Oh my dearest Solar odds give truth

There is more there if you wish to compare
As you do add the odds, you'll begin to stare

What is the matter with you they will ask
Senga is Agnes, he's doing his task

I don't want no publicity
I don't want black heart freaks coming for me
I don't want to be swept away hidden in a closet
I don't want ego's drinking from my faucet

But I have no choice in the matter
To much honey has made me fatter

I consume the green grass hoppers it helps me to sees
Then I wipe ashes from my head as I cry, honey from bees
Dripping off my lips as I stare off in the sky
I no longer need to ask God why.

For my seekers

After you cry and get it all out
Backbone strong now, start to shout

If you can do this little thing
Then you have understood time and when the bell rings.

They make a place for themselves you see
Fresh water and mountains where waves can't be

The little arks they do build now
There is no room for you in this holy cow

They make sure there bloodlines stay intact
Future kings and queens black hearts chaos attack

Fire and evil I will extinguish in my pool
A quote for you now, Mr. Solar, its not my cool (saying)
Bald and gold chains, I pity the fool! (Mr. T)

Oh my dearest seekers I can't really show
For this book is yours to write, now I must go

One last thing to make you go ding
One last word on the wedding ring

Leed skal nin or as you been all saying

Led skal nine, let me save you a little time

For his name means.....

“Lead scale of time” because time is based on 9’s
6105195 is the end date twice
Solstice or 19 months 5 days that’s nice

If you could understand the 1/37th
If you could understand time and 1/137th

7129 times those centuries of the sun
370708 years has counted backwards till its done

Pretty funny how Ed’s numbers fit into things
Pretty funny how Ed’s numbers make you have dings

For if you understood time in its place
Then you would understand all, I make my case

For if you know the scales of snakes
Fractals to geometry made bee day-cakes

If you knew that 10 cent rattle
9 base numbers is half the battle.

Love Peace

Senga
